Foucault's and Gilles Deleuze's ideas to better understand how accountability policy affected teachers. The case study examines different vectors of power and demonstrates how teachers interacted with each other and interacted with their immediate policy environments. This unique book provides readers with grounded insights into Foucault's and Deleuze's ideas by paying close attention to the macro and micro political worlds of schools as teachers struggle with new forms of performance accountability. The book illustrates ideas of power politics and policy with a unique use of surrealist art to illustrate the philosophical ideas at play in the case study.
