Mngomezulu,2012-01-01 The main objective of this book is to establish the salient reasons why higher education was developed in East Africa and specifically why the Federal University of East Africa was constituted The book will identify the factors responsible for the collapse of this regional institution in June 1970 Another objective of this book is to demonstrate how the history of the University of East Africa sheds light on colonial and post colonial policies on education especially higher education as a contribution to educational planning in contemporary Africa Human Assessment and Cultural Factors John W. Istanbul conference of 1971 Cronbach and Drenth 1972 the Kingston conference shows that great progress has been made by the community of cross cultural psychologists The progress is as much in the psychology of the investigators as in the investigations being reported In 1971 the investigators were mostly strangers to each other Behind their reports lay radically different field experiences disparate research traditions and mutually contradictory social ideals Istanbul was not a Tower of Babel but participants did speak past each other Now a community exists thanks to the meetings of NATO and the International Association for Cross Cultural Psychology to flourishing journals and the Triandis et al 1980 Handbook The members tend to know each other can anticipate how their formulations will fall on the ears of others and accept superficially divergent approaches as making up a collective enterprise Ten years ago there was open conflict between those who confronted exotic peoples with traditional tests and applied traditional interpretations to the responses and the relativists who insisted that tasks test taking and interpretation cannot be standardized in the ways that matter Today s investigators are conscious of the need to revalidate tasks carried into alien settings they often prefer to redesign the mode of presentation and to attune the subject to test taking They face the difficulties squarely and recognize that even the best means of coping are only partially successful **Cracks in the Crescent** Hussein Hajji Wario,2009-02 Cracks in the

Librarianship as a Bridge to an Information and Knowledge Society in Africa Alli Mcharazo, Sjoerd Koopman, 2008-11-03 Knowledge Management was the theme of the Standing Conference of Eastern Central and Southern African Library and Information Associations SCECSAL XVII in 2006 This selection of conference papers provides a cross disciplinary approach to knowledge information and development and how the three together can mould a new and more informed society The challenge is to make our libraries more people centered and Afro centric not simply serving the interests of the elite and paying little attention to the plight of the less well off This needs to change with libraries becoming more inclusive and serving the needs of all These papers raise provocative questions and provide an insight into the struggle of information services in this part of Africa to be part of an emerging information and knowledge society

Positioning Diversity in Kenyan Schools Malve von, 2022-06-01 Education is considered key for societies to achieve greater social cohesion and equality Yet schools as the main providers of formal education have increasingly come into question concerning their role in manifesting and perpetuating social categorisations inequalities and discrimination instead of decreasing existing fragmentations and challenging power relations and hierarchies As a diverse society Kenya is faced with power struggles and rivalries between different groups for instance along ethnic lines often constructed deep in colonial history This affects teaching and learning in school and the result is that Kenya is faced with vast disparities in terms of educational access and success rendering some social groups marginalised and others favoured Positioning Diversity at Kenyan Schools explores the ways in which teachers in Kenyan primary and secondary schools experience and deal with social categorisations and diversity in terms of ethnicity gender wealth culture religion etc in their professional practice and in the current education system Using critical pedagogy and diversity theory as a lens for positioning diversity in Kenyan schools the questions that this book sets out to answer are In what ways do the teachers and schools practices lead to transformation in terms of more social equality and less discrimination In what ways do the practices manifest existing group categorisations hierarchies and discrimination How can schools and teaching practices in postcolonial Kenya become more inclusive and foster social cohesion and equality
