

## LOGICAL DIVISION OF IDEAS

---

Logical division of ideas is a pattern of organization in which you divide a topic into main points and discuss each main point separately (in different paragraph). When you use logical division to organize a paragraph, begin with a topic sentence that presents your division of ideas (your main point) clearly, for example:

*There are several reasons that a vegetarian lifestyle is beneficial.*

*There are three kinds of apps that all smart phones should have.*

In the supporting sentences, discuss each main point one after the other. Introduce each main point with a signal word or phrase such as *the first reason...*, *the second type...*, *in addition*, etc.

*One reason to be a vegetarian is that it can increase health.*

*In addition, every smartphone needs mapping software.*

Support each main point with a brief explanation, short description, or a convincing detail, such as an example or a statistic (numbers-costs, amounts, percentages, and so on).

*Because vegetables have plenty of vitamins and fiber, they play an important role in the prevention of disease.*

*Apps such as Google Maps offer information for people who are travelling by car, on public transportation, or on foot.*

At the end of a paragraph with a logical division pattern, writers usually summarize the main points.

*For all these reasons, being a vegetarian is a wise choice.*

*In brief, people can get the most from their smart phones by loading the right kinds of apps.*

### Cohesive and Coherent Essay

In a paragraph with unity or cohesion, all the supporting sentences work together to support the topic sentence. Each sentence is directly linked to the topic. A well-written academic paragraph must have coherence in addition to unity. A paragraph with coherence is logical. All the sentences are easy to follow because they are in a logical order and are well connected. There are transition signals to help the reader along the way. For example:

*Teenagers, on the other hand, want to feel popular.*

*High school students have a surprising amount of money to spend, so advertisers research teenage fads and fashions.*

The following chart presents several transition signals.
