**Performance Modification Via Membrane Stretching** Douglas R. Lloyd, 2006 The hypothesis of this research was that by stretching microfiltration or ultrafiltration membranes their performance in terms of flux and rejection could be improved Stretching a membrane was envisioned to stretch its pores or change the aspect ratio of the pores It was thought that changing the aspect ratio could lead to improved flux by

increasing the pore area while also improving the rejection of particles by decreasing the length of the minor axis The objective of this research was to study the effects of uniaxial stretching of microporous membranes and thereby change the aspect ratio on their performance measured in terms of flux and particle rejection      A Comprehensive Approach to Digital Manufacturing Arif Sirinterlikci,Yalcin Ertekin,2023-04-04 This book draws a comprehensive approach to digital manufacturing through computer aided design CAD and reverse engineering content complemented by basic CNC machining and computer aided manufacturing CAM 3D printing and additive manufacturing AM knowledge The reader is exposed to a variety of subjects including the history development and future of digital manufacturing a comprehensive look at 3D printing and AM a comparative study between 3D printing and AM and CNC machining and computer aided engineering CAE along with 3D scanning Applications of 3D printing and AM are presented as well as multiple special topics including design for 3D printing and AM DfAM costing sustainability environmental safety and health EHS issues Contemporary subjects such as bio printing intellectual property IP and engineering ethics virtual prototyping including augmented virtual and mixed reality AR VR MR and industrial Internet of Things IIoT are also covered Each chapter comes with in practice exercises and end of chapter questions which can be used as home works as well as hands on or software based laboratory activities End of chapter questions are of three types mainly review questions which can be answered by reviewing each chapter research questions which need to be answered by conducting literature reviews and additional research and discussion questions In addition some of the chapters include relevant problems or challenges which may require additional hands on efforts Most of the hands on and practical content is driven by the authors previous experiences The authors also encourage readers to help improve this book and its exercises by contacting them      Aircraft Engineering and Aerospace Technology ,1995
