Domesticity in the Making of Modern Science Donald L. Opitz, Staffan Bergwik, Brigitte Van Tiggelen, 2016-01-26 The history of the modern sciences has long overlooked the significance of domesticity as a physical social and symbolic force in the shaping of knowledge production This book provides a welcome reorientation to our understanding of the making of the modern sciences globally by emphasizing the centrality of domesticity in diverse scientific enterprises Journal of the House of Representatives of the United States United States. Congress. House, 2014 Some vols include supplemental journals of such proceedings of the sessions as during the time they were depending were ordered to be kept secret and respecting which the injunction of secrecy was afterwards taken off by the order of the House **Where Have All the Democrats Gone?** Ruy Teixeira, John B. Judis, 2023-11-07 A Wall Street Journal Best Political Book of 2023 A much needed wake up call for the Democrats which reveals how the party has lost sight of its core principles and endangered its political future from the authors of one of the most influential political books of the 21st century The New York Times For decades American politics has been plagued by a breakdown between the Democratic and Republican parties in which victory has inevitably led to defeat and vice versa Both parties have lost sight of the people at the center of the American electorate leading to polarization and paralysis In Where Have All the Democrats Gone John B Judis and Ruy Teixeira reveal the tectonic changes shaping the country's current political landscape that both pundits and political scientists have missed The Democratic Party once the preserve of small towns as well as big cities and of the industrial working class and the newly immigrated has abandoned and even actively alienated many of these voters In this clarion call and essential argument for common sense and common ground Judis and Teixeira reveal the transformation of American politics and provide a razor sharp critique of where the Democrats have gone awry and how they can avoid political disaster in the days ahead **A History of Scientific Journals** Aileen Fyfe, Noah Moxham, Julie McDougall-Waters, Camilla Mørk Røstvik, 2022-10-03 Modern scientific research has changed so much since Isaac Newton's day it is more professional collaborative and international with more complicated equipment and a more diverse community of researchers Yet the use of scientific journals to report share and store results is a thread that runs through the history of science from Newton's day to ours Scientific journals are now central to academic research and careers Their editorial and peer review processes act as a check on new claims and findings and researchers build their careers on the list of journal articles they have published The journal that reported Newton's optical experiments still exists First published in 1665 and now fully digital the Philosophical Transactions has carried papers by Charles Darwin Dorothy Hodgkin and Stephen Hawking It is now one of eleven journals published by the Royal Society of London Unrivalled insights from the Royal Society's comprehensive archives have enabled the authors to investigate more than 350 years of scientific journal publishing The editorial management business practices and financial difficulties of the Philosophical Transactions and its sibling Proceedings reveal the meaning and purpose of journals in a

changing scientific community At a time when we are surrounded by calls to reform the academic publishing system it has never been more urgent that we understand its history

Arctic Circles and Imperial Knowledge Annaliese Jacobs Claydon, 2023-12-28 In 1845 an expedition led by Sir John Franklin vanished in the Canadian Arctic The enduring obsession with the Franklin mystery and in particular Inuit information about its fate is partly due to the ways in which information was circulated in these imperial spaces This book examines how the Franklins and other explorer families engaged in science exploration and the exchange of information in the early to mid 19th century It follows the Franklins from the Arctic to Van Diemen s Land charting how they worked with intermediaries imperial humanitarians and scientists and shows how they used these experiences to claim a moral right to information Arctic Circles and Imperial Knowledge shows how the indigenous peoples translators fur traders whalers convicts and sailors who explorer families relied upon for information were both indispensable and inconvenient to the Franklins It reveals a deep entanglement of polar expedition with British imperialism and shows how geographical knowledge intertwined with convict policy humanitarianism genocide and authority In these imperial spaces families such as the Franklins negotiated their tenuous authority over knowledge to engage with the politics of truth and question the credibility and trustworthiness of those they sought to silence

Global Learning and International Development in the Age of Neoliberalism Stephen McCloskey, 2021-10-13 This book argues that the international development sector is in crisis which can be mostly sourced to its side stepping the dominant development question of our age the neoliberal growth paradigm It argues that this crisis can be addressed at least in part by the sector s re engagement with the radical development education process that it helped to foster and sustain for over two decades The recent safeguarding scandal is symptomatic of a sector that is becoming overly hierarchical brand conscious and disconnected from its base This book argues that many of the problems the sector is facing can be sourced to its failings in grappling with the question of neoliberalism and formulating a coherent critique of how market orthodoxy has accelerated poverty in the global North and South This book recommends re embracing the radical origins of global learning situated in the participative methodology and praxis reflection and action of Paulo Freire both as internal capacity building and external public engagement The book proposes a new development paradigm focusing on bottomup participative approaches to policy making based on the needs of those NGOs claim to represent the poor marginalised and voiceless rather than constantly following the agenda of donors and governments The recommendations made by this book will serve as an important resource for researchers and students of international development and global learning as well as to NGOs civil society activists and education practitioners looking for solutions to the problems within the sector

Climate Travels Michael M. Gunter, Jr., 2023-03-28 Winner 2023 Choice Outstanding Academic Title Winner 2023 Foreword INDIES Book of the Year Award in the category of Ecology and Environment Foreword Reviews Many accounts of climate change depict disasters striking faraway places melting ice caps fearsome hurricanes all consuming fires How can seeing the consequences of human

impacts up close help us grasp how global warming affects us and our neighbors This book is a travelogue that spotlights what a changing climate looks like on the local level for wherever local happens to be Michael M Gunter Jr takes readers around the United States to bear witness to the many faces of the climate crisis He argues that conscientious travel broadens understanding of climate change and makes its dangers concrete and immediate Vivid vignettes explore the consequences for people and communities sea level rise in Virginia floods sweeping inland in Tennessee Maine lobsters migrating away from American territorial waters and imperiled ecosystems in national parks from Alaskan permafrost to the Florida Keys But Gunter finds inspiring initiatives to mitigate and adapt to these threats including wind turbines in a tiny Texas town green building construction in Kansas and walkable urbanism in Portland Oregon These projects are already making a difference and they underscore the importance of local action Drawing on interviews with government officials industry leaders and alternative energy activists Climate Travels emphasizes direct personal experience and the centrality of environmental justice Showing how travel can help bring the reality of climate change home it offers readers a hopeful message about how to take action on the local level themselves

Fuel Karen Pinkus,2016-11-01 Fuel is an idiosyncratic speculative dictionary of fuels real and imagined historical and futuristic hopeless and utopian Drawing on literature film and scientific treatises most produced long before climate change was in circulation Fuel argues for a distinction between energy a system of power and fuel a substance which can be thought of as potentiality as it endeavors to undo the dream that we can simply switch to renewables and all will be golden From Air to Zyklon B entries in this unusual dictionary include Algae Clathrates Dilithium Fleece Goats Theology Whale Oil and many many more The tone of the entries ranges as widely as the topics from historical anecdotes the Ford Fiesta boozemobile to eccentric readings of the classics of energy lit Germinal and Oil from literary observations a high octane Odyssey to excursions into literary theory The dictionary draws from an eccentric canon including works by Jules Verne George Eliot s Silas Marner Paolo Bacigalupi s Windup Girl and the Tom Cruise vehicle Oblivion among others A message from this ambitious project is that energy can be understood as a heterogeneous set of self mystifying systems or machines that block access to thought as they fascinate us Fuels emerge as more primal elements that the audience can grasp at various points along the way to consumption combustion This dictionary can help scramble our thinking about fuel not in order to demonize energy and not in order to create a new hierarchy in which certain renewables take over from fossil fuels but instead to open up potential ways of interacting with real and imaginary substances by wrenching them out of narrative and placing them into an idiosyncratic dictionary to be applied by readers into new narratives
