Delivering Family Justice in the 21st Century Mavis Maclean, John Eekelaar, Benoit Bastard, 2015-08-27. Family justice requires not only a legal framework within which personal obligations are regulated over the life course but also a justice system which can deliver legal information, advice and support at times of change of status or family stress together with mechanisms for negotiation, dispute management and resolution with adjudication as the last resort. The past few years have seen unparalleled turbulence in the way family justice systems function. These changes are associated with economic constraints in many countries including England and Wales where legal aid for private family matters has largely disappeared. But there is also a change in ideology in a number of jurisdictions including Canada towards what is sometimes called neo liberalism whereby the state seeks to reduce its area of activity while at the same time maintaining strong views on family values. Legal services may become fragmented and marketised and the role of law and lawyers reduced while self-help web-based services expand. The contributors to this volume share their anxieties about the impact on the ability of individuals to achieve fair and informed resolution in family matters.

The Customs Valuation Agreement Mark K. Neville, 2023-03-09. Global Trade Law Series Volume 58. Customs valuation is a key element in the corpus of international trade law. Despite the facts that the WTO Valuation Agreement 1994 remains unchanged in all material respects and that it has been adopted by virtually every trading nation on the planet, there are fissures in the system preventing consensus on many contentious questions. This extremely knowledgeable analysis by a world-renowned specialist lawyer in the field, by concentrating on diverging views on the nature of the central feature of the Agreement, the definition of the price actually paid or payable (PAPP), provides the most extensive study available of the origins and architecture of the Valuation Agreement and its intersection with transfer pricing norms. Among much else, the author fully explains differing views on such questions as the following: criteria governing royalties and license fees; acceptability of the First Sale for Export doctrine; role of transport charges in valuing dutiable goods; status of interest payments on deferred payments; valuation of carrier media bearing software; for data processing equipment; inclusion or exclusion of transport charges in the PAPP; status of the WTO's moratorium on electronic transmissions; status of payments of money for tools and other materials used in producing the imported goods; and status of international instruments of traffic. The author expertly assesses interpretations of the Valuation Agreement as presented in the instruments of the World Customs Organization and in the administrative and judicial fora of the United States, Canada and the European Union. This matchless book takes a giant step toward real-world consensus on the daunting questions of custom valuation. Customs and

international tax professionals as well as academic scholars will come away from its in depth coverage with an enhanced ability to discern the logic inherent in the Valuation Agreement a greater awareness of current trends and their origins in authoritative customs valuation bodies and improved confidence when approaching customs valuation questions
