,2000-10 Guide to Microbiological Control in Pharmaceuticals and Medical Devices, Second Edition Stephen P. Denyer, Rosamund M. Baird, 2006-12-26 Microbiological matters continue to exercise considerable influence on product quality. In both the pharmaceutical and medical device industries, products of greater sophistication along with evolving regulatory requirements are elevating the challenges related to maintaining microbiological integrity. Updated to reflect technological and regulatory changes, the Guide to Microbiological Control in Pharmaceuticals and Medical Devices, Second Edition covers those principal aspects of microbiology that are relevant to the preformulation, formulation, manufacturing, and license application stages involved with the production of pharmaceuticals and medical devices. In recognition of the diverse disciplines involved in pharmaceutical and medical device production, this work provides a brief introduction to microbiology geared towards the nonmicrobiologist. Covering good manufacturing practice in the control of contamination, the text explores quality control, the preservation of formulations, and principles of sterilization, including microbiological specific considerations for biotechnological products and other medical devices. It also provides additional materials on package integrity and contamination risks in clean rooms. The editors have produced a companion text, the Handbook of Microbiological Quality Control in Pharmaceuticals and Medical Devices, see reverse, which when paired with the Guide offers a complete theoretical and practical treatment of microbiological control. This book provides a comprehensive distillation of information concerning methodology and regulations that would otherwise remain scattered throughout the literature. It allows scientists from many fields to address potential problems in advance and implement suitable strategies at the earliest stages of development.

Handbook of Research on Inclusive Development for Remote Adjunct Faculty in Higher Education Dailey-Hebert, Amber, Mandernach, B. Jean, Donnelly-Sallee, Emily, 2020-10-16 As the number of adjunct faculty teaching online courses remotely for their institutions continues to increase, so do the unique challenges they face, including issues of distance and isolation, as well as problems pertaining to motivation, time, and compensation. Not only are these higher education faculty geographically isolated from each other and their colleagues at flagship campuses, but they also lack adequate institutional support and resources necessary to perform their roles. As institutions continue to rely heavily on this group of under-supported and under-trained instructors who teach the majority of online courses offered across the country, institutions need models and strategies to tap the expertise and perspectives of this group, not only to improve teaching and learning in online programs, but also to retain this critical talent pool. More consideration is needed to create institutional affinity and organizational commitment, build community, and create opportunities for remote adjunct faculty to be included as an integral component to their academic departments. The Handbook of Research on Inclusive Development for Remote Adjunct Faculty in Higher Education is a comprehensive reference work that presents research, theoretical frameworks, instructor perspectives, and program models that highlight effective strategies, innovative approaches, and unique considerations for creating professional development opportunities for remote adjunct faculty teaching online. This book

provides concrete practices that foster inclusivity among contingent faculty teaching online as well as tangible practices that have been successfully implemented from faculty developers and academic leaders at institutions who have a large population of and heavy reliance on remote adjunct instructors While addressing topics that include faculty engagement mentoring programs and instructor resources this book intends to support remote instructors in the post pandemic world It is also beneficial for faculty development professionals academic administrative leaders higher education stakeholders and higher education faculty researchers and students
