Practice-Focused Research in Further Adult and Vocational Education Margaret Gregson, Patricia Spedding, 2020-07-29 This book examines how educational practice can be improved through practice focused educational research The editors and contributors explore the issues involved in breaking down boundaries between educational research and practice

research often seen as an elitist activity that can only be determined by a favoured few as well as the socially constructed nature of boundaries between academic and vocational education. Containing illuminating case studies written by practicing teachers from the further and vocational education sector, it posits that educational research should enable teachers to learn from research in order to improve their own educational practice. This book will be of interest and value to scholars of further and vocational education as well as those wanting to bridge the gap between research and practice.
