Image-guided Radiation Therapy Arno J. Mundt, John C. Roeske, 2010-12-31

Image Guided Radiation Therapy IGRT is a true revolution in the field of radiation oncology IGRT provides the unprecedented means of conforming dose to the shape of the target tissues in 3 dimensions reducing the risk of complications thereby improving the quality of life of irradiated patients Moreover IGRT provides the means to deliver higher than conventional doses thus improving the chance of cure in these patients Despite its established benefits several barriers exist to the widespread clinical implementation of IGRT In the past great concerns existed regarding the large capital outlay needed for both software and hardware This barrier is less relevant today given the increased reimbursements possible with IGRT Today the most significant barrier is education IGRT is a fundamentally new approach to both treatment planning and delivery Adoption of the IGRT approach entails new ways of thinking in regard to patient selection treatment planning and quality assurance measures Unfortunately apart from a few University based short courses limited resources are available for the physician and physicist interested in learning IGRT

**Medical Image Computing and Computer-Assisted Intervention -- MICCAI 2010** Tianzi Jiang, Nassir Navab, Josien P.W. Pluim, Max A. Viergever, 2010-09-21 The 13th International Conference on Medical Image Computing and Computer Assisted Intervention MICCAI 2010 was held in Beijing China from 20-24 September 2010

The venue was the China National Convention Center CNCC China's largest and newest conference center with excellent facilities and a prime location in the heart of the Olympic Green adjacent to characteristic constructions like the Bird's Nest National Stadium and the Water Cube National Aquatics Center MICCAI is the foremost international scientific event in the field of medical image computing and computer assisted interventions The annual conference has a high scientific standard by virtue of the threshold for acceptance and accordingly MICCAI has built up a track record of attracting leading scientists engineers and clinicians from a wider range of technical and biomedical disciplines This year we received 786 submissions well in line with the previous two conferences in New York and London Three program chairs and a program committee of 31

scientists all with a recognized standing in the field of the conference were responsible for the selection of the papers. The review process was set up such that each paper was considered by the three program chairs, two program committee members and a minimum of three external reviewers. The review process was double blind so the reviewers did not know the identity of the authors of the submission. After a careful evaluation procedure in which all controversial and gray area papers were discussed individually, we arrived at a total of 251 accepted papers for MICCAI 2010 of which 45 were selected for podium presentation and 206 for poster presentation. The acceptance percentage 32% was in keeping with that of previous MICCAI conferences. All 251 papers are included in the three MICCAI 2010 LNCS volumes.
