Philosophy for Children Through the Secondary Curriculum Lizzy Lewis,Nick Chandley,2012-05-17 Philosophy for

Children P4C is an approach to learning and teaching that aims to develop reasoning and judgement. Students learn to listen to and respect their peers' opinions, think creatively and work together to develop a deeper understanding of concepts central to their own lives and the subjects they are studying. With the teacher adopting the role of facilitator, a true community develops in which rich and meaningful dialogue results in enquiry of the highest order. Each chapter is written by a leading P4C expert and provides an introduction to the relationship between P4C and the subject area, lesson stimuli and activities for extending and deepening students' thinking. The book includes guidance on how to embed P4C in curriculum subjects in a crowded and demanding secondary curriculum, timetable troubleshooting advice for the teacher-turned-facilitator, a companion website containing useful links, downloadable resources and material to display on your interactive whiteboard. Edited and collated by the UK's leading P4C organisation, this book introduces a rationale for using and adapting P4C in the secondary curriculum.

Practice with Purpose Debbie Diller, 2023-10-10. In her 30 years as an educator, Debbie Diller has closely examined classroom practice, asking: Why? What's the purpose? Watching primary students work successfully at literacy work stations, she wondered with teachers: Why don't we have upper grade students doing this? Could we kick it up a notch? In her new book, Debbie shows teachers of grades three to six how to structure their classrooms so that all students can be successful doing meaningful independent work using literacy work stations. *Practice with Purpose* offers guidance on establishing routines for independent reading and response writing, as well as step-by-step instructions on how to set up and manage a variety of hands-on literacy work stations appropriate for intermediate students. Each chapter includes how to introduce the station, innovative ways to use materials, what to model to guarantee independence, how to troubleshoot, assessment and accountability ideas, how the station supports student achievement on state tests, reflection questions for professional development. The extensive appendix includes time-saving tools such as management board icons, graphic organizers, task cards, and recommended Web sites and children's literature.

P4C Pocketbook Barry Hymer, 2012-01-01. Philosophy for Children (P4C) was conceived by Professor Matthew Lipman in the late 1960s. Here's what he said about it: The aim of a thinking skills program such as P4C is to help children become more thoughtful, more reflective, more considerate, and more reasonable individuals. Who wouldn't want to offer their pupils that opportunity? In the *P4C Pocketbook*, Barry Hymer and Roger Sutcliffe explain how to use P4C in your own classroom to sustain and develop in all children the curiosity that is so evident in the young. They introduce and explain communities of enquiry, outline a broad ten-step process for P4C sessions, provide plenty of practical examples, and show how P4C can be used to explore key concepts. Chapters are devoted to choosing a stimulus, questions, the Socratic Method, facilitating an enquiry, and review. There is an excellent resource section at the end of the book spanning Foundation Stage to KS5.
