Morse,2012-12-06 The Fourth International MCDM Conference follows a tradition that began with an exploratory gathering at the University of South Carolina in 1973 The First International Conference was held in Jouy en Josas in 1975 The second and third were held in Buffalo 1977 and KOnigswinter 1979 We are grateful to the Office of Naval Research for years of advice and funding and to Springer Verlag for providing a widely dispersed series of proceedings volumes In the case of the Delaware Conference we gratefully acknowledge new support from the corporate sector coordinated by the University of Delaware's Development Office Now that I have attended to the formal recognitions I wish to place my recollection of the human side of the

conference into the record This is justifiable because multiple criteria problem solving has been nurtured by a close knit group of people whose interactions are not fully captured by the standard journal format This was the conference in which an animated discussion between Dave Bell and Paul Schoemaker caused Mathilde Stephenson to stand up and say Don't stop it this is the best part of the conference Another sort of moment occurred when Lucas Pun was asked to explain a certain Chinese character in one of his transparencies He replied No alcohol allowed From Erick Duesing speaking with an historical perspective we had the insight that multiple criteria methods languished because McCarthyism had made planning suspect *Theory and Applications of Satisfiability Testing* Fahiem Bacchus, Toby Walsh, 2005-06-02 The 8th International Conference on Theory and Applications of Satisfiability Testing SAT2005

provided an international forum for the most recent research on the satisfiability problem SAT SAT is the classic problem of determining whether or not a propositional formula has a satisfying truth assignment It was the first problem shown by Cook to be NP complete Despite its seemingly specialized nature satisfiability testing has proved to be extremely useful in a wide range of different disciplines both from a practical as well as from a theoretical point of view For example work on SAT continues to provide insight into various fundamental problems in computation and SAT solving technology has advanced to the point where it has become the most effective way of solving a number of practical problems The SAT series of conferences are multidisciplinary conferences intended to bring together researchers from various disciplines who are interested in SAT Topics of interest include but are not limited to proof systems and proof complexity search algorithms and heuristics analysis of algorithms theories beyond the propositional hard instances and random formulae problem encodings industrial applications solvers and other tools This volume contains the papers accepted for presentation at SAT 2005 The conference attracted a record number of 73 submissions Of these 26 papers were accepted for presentation in the technical programme In addition 16 papers were accepted as shorter papers and were presented as posters during the technical programme

The accepted papers and poster papers cover the full range of topics listed in the call for papers **WALCOM: Algorithms and Computation** Gautam K. Das, Partha S.
