

Introduction paragraph - example

Q: Discuss how media can influence children.
Use specific examples to support your view.

Media, particularly television, has a significant role in the everyday lives of children. The way media influences children can be both positive and negative. Quality television and written texts can provide positive role models and opportunities for learning. However, media showing excessive or gratuitous behaviours can be harmful to the development of children's attitudes and values. Initially, a discussion about the many types of media will caution that it cannot be assumed media has the same effects on all children. Further, it will be shown that media can be actively used to achieve beneficial outcomes among children, including the range of educational television tailored for children that build social skills and introduce children to diverse themes and topics. In contrast, the negative impacts of media, including exposure to inappropriate material, creating a sense of entitlement, increasing peer pressure and restricting contact children have with real people will be examined. Finally, the amount and type of media, variety and quality of content will be discussed to highlight that media becomes harmful to children when exposure to media is not monitored or when children miss out on other activities, such as exercise and social play.
