Good reasoning can lead to success bad reasoning can lead to catastrophe
Yet it's not obvious how we reason and why we make mistakes so much of our mental life goes on outside our awareness
In recent years huge strides have been made into developing a scientific understanding of reasoning
This new book by one of the pioneers of the field Philip Johnson Laird looks at the mental processes that underlie our reasoning
It provides the most accessible account yet of the science of reasoning
We can all reason from our childhood onwards but how
How we reason outlines a bold approach to understanding reasoning
According to this approach we don't rely on the laws of logic or probability we reason by thinking about what's possible we reason by seeing what is common to the possibilities
As the book shows this approach can answer many of the questions about how we reason and what causes mistakes in our reasoning that can lead to disasters such as Chernobyl
It shows why our irrational fears may become psychological illnesses why terrorists develop crazy ideologies and how we can act in order to improve our reasoning
The book ends by looking at the role of reasoning in three extraordinary case histories the Wright brothers use of analogies in inventing their flyer the cryptanalysts deductions in breaking the German's Enigma code in World War II and Dr John Snow's inductive reasoning in discovering how cholera spread from one person to another
Accessible stimulating and controversial
