

BUILDING & OPERATING THE RASCALSOUND CARD INTERFACE

Copyright © 1999-2009. This kit is available at: www.BUCKSCDM.com

Buck ROGERS, K4ALT@PackardRadio.com

The diagram above is only an EXAMPLE! Some PCs may have slightly different sound card I/O configuration.

542-2211

BL550-01. The "Bicycle and Scooter Care, Storage, and Use"

When we receive the **RASCAL™** ISO-KIT, we examine the parts and open the diagram. Look over the schematic and view the pictorial of the PC board. Get an idea how the parts are arranged on the PC board (PCB). We learn the interface that everyone has been touring as large and difficult, is not at all complicated. In fact, with our **RASCAL™**, it is an easy, and straight-forward assembly that can easily be completed in a couple of hours. Soon you are on the air operating PSK31, SSTV, MFSK, RTTY, Packet and many other fun-filled digital modes.

Don't get in a hurry, take a few minutes to look over the drawings, illustrations, and pictorials, and become familiar with who's on first... and what's on third! I recommend using a small tip (pre-tinned preferred), pencil type soldering iron (35-40 watt). If available, use a controlled heat solder station. When building the wired and tested **RASCAL™**, I use the Weller WLC-100 variable heat (controlled) solder station with an ST-1 tip. Keep the tip clean, I use a small damp sponge to clean my soldering iron tip.

THE CAVEATS

Without beating a subject to bits... and bytes, I want to drive home a simple, but important point: If you are new to soldering, there are some rules to follow. First and foremost, **DO NOT overheat wires that are shielded!** When soldering shielded wires, the center conductor may have a thin layer of insulation that can melt quickly and allow a short to occur between the center conductor and the shield. When this happens, there will be little or no output (or input), or the shielded cable will simply not perform the function for which it was intended. **NO TECH SUPPORT FOR KITS.**

Too much heat can be as damaging as not enough heat. As soon as the solder flows in the wire to wire or wire to trace, remove the soldering iron. Be sure to use a good rosin-core solder. DO NOT use acid core solder or cleaner. As an added assist, I use a "LUXO" lighted Magnifier to view the small components, and solder traces... as something happened to my eye-sight when I passed 65 years of age.

Htx252 Service Manual
