

1. Neutral the hand brake

The easiest way to move the vehicle from a parked position to a driving position is to use the hand brake. To ensure this you should use the hand brake to the handle of the selector lever (that is, to the handle of the selector lever) and not the handle of the hand brake.

When manually downshifting, the vehicle will not move into the gear you require unless the hand brake is released and the engine is running.

An "uphill and away" system will also move the vehicle.

Roll-down device

The roll-down device gives movement to the selector lever when the selector lever is moved down past the full service brake (braking on) and the engine starts. The device is also released (roll-down) when the transmission changes from one gear to the next gear.

WARNING

Be careful when using the roll-down on slippery roads. Rapid acceleration may cause skidding.

Driving the Automatic transmission**Starting the engine**

The vehicle must be in **N (Neutral)** or **P (Park)** when the driving position is engaged. Unless the vehicle is in one of these positions, the engine will not start.

Selecting a driving position**WARNING**

When the vehicle is in a driving position, the selector lever must be moved past the service brake. Do not release the parking brake or hand brake until the vehicle is in gear. Release the parking brake only when the vehicle is in gear and the engine is running.

If the engine does not start, the selector lever may be moved down past the service brake and the engine started. Do not move the selector lever to **P (Park)** until the engine has started. Otherwise, the selector lever will not move into the driving position and the vehicle will not start.

If the selector lever is moved down past the service brake and the engine starts, the vehicle will not move into the driving position. Do not move the selector lever to **P (Park)** until the engine has started. Otherwise, the selector lever will not move into the driving position.

If the selector lever is moved down past the service brake and the engine starts, the vehicle will not move into the driving position. Do not move the selector lever to **P (Park)** until the engine has started. Otherwise, the selector lever will not move into the driving position.

Never shift into **R (Reverse)** or **P (Park)** when the vehicle is in motion.

**Putting off**

When the engine is running, the selector lever can be moved down past the service brake and the engine started.

Shifting gears

When shifting gears, the selector lever must be moved down past the service brake and the engine started. Do not move the selector lever to **P (Park)** until the engine has started. Otherwise, the selector lever will not move into the driving position.

Shift to drive, road or low

When shifting gears, the selector lever must be moved down past the service brake and the engine started. Do not move the selector lever to **P (Park)** until the engine has started. Otherwise, the selector lever will not move into the driving position.

WARNING

When shifting to drive, road, or low, the selector lever must be moved down past the service brake and the engine started. Do not move the selector lever to **P (Park)** until the engine has started. Otherwise, the selector lever will not move into the driving position.

Do not repeat "warning" text and text with already appearing in this section. Always use the correct text in the correct position.

Putting

When the engine is running, the selector lever can be moved down past the service brake and the engine started. Do not move the selector lever to **P (Park)** until the engine has started. Otherwise, the selector lever will not move into the driving position.
