Writing Term Papers with Cool New Digital Tools Joe Greek, 2013-12-15 In the not too distant past students were expected to turn in only handwritten or typed papers. However, with today's ease of access to the Internet and free applications, teachers are now expecting students to go beyond the confines of text-only productions. Various online programs make it possible to create multi-layered term papers that are rich in images, audio, and even video. And most of these tools are free to use. Students can now access their work from nearly anywhere that has an Internet connection. In the case of collaborative research projects, this same technology allows team members to work with each other even when they are in different locations. A wide variety of online and offline tools, techniques, and tips to help students research, write, edit, prepare, and present term papers are discussed and explained here. This revelatory guidebook to the latest in term paper technology also supports Common Core Standards for the reading of technical accounts and texts.

The Kinneavy Papers Lynn Worsham, Sidney I. Dobrin, Gary A. Olson, 2000-04-20 Documenting an era of dramatic change and growth in the sophistication of scholarship in rhetoric and composition studies, this book includes essays which find in contemporary theory the language to ask new questions, to reframe existing problems, and to move beyond current impasses in thought and action. The different perspectives offer a stand against current backlash theory as seen in the reassertion of expressivism and creative writing as the antidote to the difficulties wrought by too much theorizing. All the essays included are winners of the James L. Kinneavy Award and celebrate the award's tenth anniversary as well as its founder, one of the discipline's most learned and beloved scholars. Contributors include David Bleich, Richard M. Coe, William A. Covino, Reed Way Dasenbrock, Sidney I. Dobrin, Lester Faigley, Pamela K. Gilbert, Susan C. Jarratt, Bruce McComiskey, Michael Murphy, Richard E. Miller, Jasper Neel, Gary A. Olson, Joseph Petraglia, George L. Pullman, Joy S. Ritchie, Phillip Sipiora, David W. Smit, Patricia A. The Evolution of Global Paper Industry 1800–2050 Juha-Antti Lamberg, Jari Ojala, Mirva Peltoniemi, Timo Särkkä, 2012-12-22 This book presents an historical analysis of the global paper industry evolution from a comparative perspective. At the centre are 16 producing countries: Finland, Sweden, Norway, the USA, Germany, Canada, Japan, the UK, the Netherlands, Italy, Spain, Portugal, Chile, Brazil, Uruguay, and Russia. A comparative study of the paper industry evolution can achieve the following important research objectives. First, we can identify the country-specific historical features of paper industry evolution and compare them to the general business trends explicable by existing theoretical knowledge. Second, we can identify and isolate the factors causing both the rise and fall of industrial populations. Third, a shared research agenda can produce an intensive analysis of global industry dynamics. Finally, an extended research period of 250 years can identify what is truly unique in the paper industry evolution and the extent to which it took the same path as other important manufacturing industries.
