I. BEGINNING YOUR PAPER - Topic Selection and Research

- (a) **Topic Selection:** Your topic should be something you are interested in within the confines of the course you are taking and at the instructor's discretion.
- (b) **Research:** Read as much as you can about your topic. Find as many academic sources about your topic as possible. Books are best; however, academic websites work, too (these are primarily .edu sites).
- (c) Once you understand your topic, **create a "why" or "how" question** that will generate discussion or argument.
- (d) **Thesis Statement:** Formulate a thesis statement that begins to answer the question you have about your topic. This should include an argument and several reasons to help prove your argument.
- (e) **Format:** Establish the format for your paper. This may be dependent upon the class or discipline for which you are writing your paper. Common formats include APA style, Chicago-manual style, or MLA style.

Human Resource Management Ronald R. Sims, 2007-01-01. The contributors in this book identify and clearly discuss contemporary and critical issues, challenges and opportunities in HRM. The book attempts to achieve the delicate balance between basic HRM functions and the new world of HRM. Moreover, in a dynamic field like HRM, a complete look at contemporary HRM issues, challenges and opportunities is a must for today's and tomorrow's students and future managers and leaders. After all, it is important for any book to undertake a current state of the field while also bridging the gap of traditional HRM activities, i.e., issues, challenges and opportunities and the possible future state of the HRM field. An organizing principle for this book is the need to form an integrated HRM system comprised of multiple activities designed to influence organizational and employee behaviors. The book's contributors include some basic theories and models that simultaneously consider how HRM activities like recruitment, selection, reward practices and development activities among others are being impacted by contemporary issues, challenges and opportunities for the field of HRM, particularly HRM functions and professional as they are increasingly expected to play a role in enabling organizational managers and other employees to achieve desired organizational results. Thus, the essence of the book is that the collective chapters reflect both a functional orientation built on theory and models but also provide insights into how to translate theory into practice via the establishment of the increasingly critical role HRM procedures, practices and processes play in accomplishing the goals and objectives in contemporary organizations.
