Mobile Ad-hoc and Sensor Networks Xiaohua Jia,Jie Wu,Yanxiang He,2005-12-05 This book constitutes the refereed proceedings of the First International Conference on Mobile Ad hoc and Sensor Networks MSN 2005 held in Wuhan China in December 2005 The volume also contains 12 papers of the MSN workshop on Modeling and the Security in the Next Generation Mobile Information Systems MSNG 2005 The 112 revised full papers were carefully reviewed and selected from a total of 512

submissions The papers address all current topical areas in mobile ad hoc and sensor networks such as network architecture and protocols software platforms and development tools self organization and synchronization routing and data dissemination failure resilience and fault isolation energy management data information and signal processing security and privacy network planning provisioning and deployment network modeling and performance evaluation developments and applications as well as integration with other systems

Guide to Wireless Ad Hoc Networks Sudip Misra, Isaac Woungang, Subhas Chandra Misra, 2009-03-02 Overview and Goals Wireless communication technologies are undergoing rapid advancements The past few years have experienced a steep growth in research in the area of wireless ad hoc networks The attractiveness of ad hoc networks in general is attributed to their characteristics features such as ability for infrastructure less setup minimal or no reliance on network planning and the ability of the nodes to self organize and self configure without the involvement of a centralized network manager router access point or a switch These features help to set up a network fast in situations where there is no existing network setup or in times when setting up a fixed infrastructure network is considered infeasible for example in times of emergency or during relief operations Even though ad hoc networks have emerged to be attractive and they hold great promises for our future there are several challenges that need to be addressed Some of the well known challenges are attributed to issues relating to scalability quality of service energy efficiency and security
