

Abstract

600 Gals. 30' Pulp-Handling Dual-Pass Storage with Rotating Discharge

STUDYING THE SCIENCE OF THE MIND
 Students who are interested in psychology, biology, and the human mind will find this program a great fit. The program is designed to provide students with a strong foundation in the sciences and the humanities, and to prepare them for careers in research, education, and public service.

Abstract: The purpose of this study was to determine the effect of a 12-week training program on the physical fitness and health-related quality of life of sedentary, middle-aged women. The study was a randomized, controlled trial. The subjects were randomly assigned to either a training group or a control group. The training group performed a 12-week program of aerobic and resistance training. The control group did not exercise. The results showed that the training group had significant improvements in physical fitness and health-related quality of life compared to the control group. The findings suggest that a 12-week training program can improve the physical fitness and health-related quality of life of sedentary, middle-aged women.
