

# Steps to Writing a Response Essay

## Step 1

### What you need to do prior to starting the writing process

Read provided text several times; note down any areas that you feel might be of much importance to you in essay writing process. A reading journal comes in handy here.

The notes you prepare as you read will form the basis of your reaction essay's focus. Do not worry about organization of notes at this stage; they only help you from emphasis of your essay.

## Step 3

### Start writing: Have a strong introduction

Use a strong thesis statement to hook readers. Let readers know the article or book you are writing a reaction to, and do not forget to include text's author(s). Use introduction to state your essay's focus.

## Step 5

### Conclusion

Your last paragraph, after the body, is a conclusion. It ends your essay by offering a summary of all points you have made and draws some inference.

Make your conclusion as brief as possible but informative, and leave no chances for readers to ask questions like "so what?". In addition, do not introduce any new arguments in this part.

## Step 2

### Get a topic

Just similar to any other piece of writing, this one needs to have a topic. Is the something that interested you? To establish your focus, use a couple of questions to test you just read. The following are examples of question to use:

- Is there anything significant about the text?
- What is my reaction to certain aspects of text? (what I like, dislike)
- What can I remember?
- Did I understand everything?

Your topic should be informative. While it can be overwhelming to choose something that interests you, it is also important to consider whether you will have enough points to reach to the aspect of text you are focusing on.

## Step 4

### Write the body

The body of yours essay should come immediately after introduction. Here, you need to discuss your subject deeply. Use short and precise paragraphs to divide ideas. Use one paragraph at a time to discuss new evidence but ensure that there is consistency and flow in your arguments.

Reaction essays are not short, which implies that you do not need heading everywhere, unless your teacher instructs otherwise.

## Step 6

### Editing and proofreading

Ensure that you proofread and edit your first draft. The editing part focuses on changing contents, format, and structure.

Proofreading, on the other hand, helps you identify and correct punctuation and spelling mistakes.
