Photography

The photographing of scale models is more difficult than taking single specimens and has limitations. This is because a scale model has sharp dimensions, but relatively large distances from front to back and from left to right. The type of photography requires a large amount of light and a high-quality lens, in order to achieve the necessary focus, you must use a smaller aperture (large f-number) and a longer exposure time. Here clarity and sharpness are essential and use a tripod. This will help you avoid blurring due to movement and you will be able to use a lower shutter speed. Speed is therefore the least important aspect when it comes to photographing your scale model.

If you want to take really good photographs of a scale model, you should use a view camera. This will also give you the ability to correct the perspective.

Two photographs of urban design or architectural scale models is designed to take advantage of the effects created by shadows and shadows. This will make your scale model more alive than for life. Its orientation will correspond to reality in a natural way. The method

in question has been used to photograph houses, urban development study, view of page 12

Photographing your scale model is a study on its effects because it is possible to influence them between light and shadow. This technique was used to photograph the organic structure from page 120 and a study into the incorporation of a ramp into a narrow building is presented in 121. The studio photos on the opposite page demonstrate the effect of various placements of the ground

Your mobile phone shows great versatility for your models if you would like to conserve of space inside an interior scale model. Here remember that photographs taken with a mobile or compact camera yield a different view than those taken with a high-quality single lens camera. Mobile phone photographs are more a projected presentations, but generally cannot be printed further. A side note: use a external camera or webcam fixed to your PC to take your scale model and assess the effect.
