Young Children's Amazing Math Herbert P. Ginsburg, 2025 Explore young children's amazing everyday math Ginsburg uses words and over 75 short videos to illustrate and explain the widespread development of informal knowledge about number shape space pattern and measurement Some videos show individual children from about 9 months to 6 years spontaneously engaging in everyday math at home as they eat construct sing read and more in their normal environments Other videos show individual children revealing their math thinking and strategies as they talk with an adult A final video shows a child doing her first kindergarten math homework assignment Fascinating and often funny the videos help adults to understand children's thinking and to foster the joyful development of everyday math which can provide a foundation for formal math education in kindergarten and beyond The book also offers many specific math activities designed to promote learning Everyday math can be a delight for both adults and children Enjoy it with them

Book Features An account of young children's everyday math much of which is widespread across gender socioeconomic status and culture An exploration of how understanding children's everyday math can lay the foundation for teaching school math The first extensive use of engaging videos to tell thinking stories about individual young children engaged in everyday math Videos and stories that help adults including early childhood education students professional educators and parents to understand that math learning can be enjoyable in the early years and beyond Numerous activities that teachers day care providers and parents can use to promote the development of children's everyday math Available in print with embedded QR codes for video access as well as hot links in the digital version

1001 Math Problems LearningExpress

(Organization), 1999 Contains over one thousand math problems designed to help students practice their skills and overcome math anxiety covering fractions decimals percentages basic algebra basic geometry and miscellaneous mathematics

Everyday Mathematics for Parents The University of Chicago School Mathematics Project, 2017-07-10 The Everyday Mathematics EM program was developed by the University of Chicago School Mathematics Project UCSMP and is now used in more than 185 000 classrooms by almost three million students Its research based learning delivers the kinds of results that all school districts aspire to Yet despite that tremendous success EM often leaves parents perplexed Learning is accomplished not through rote memorization but by actually engaging in real life math tasks The curriculum isn't linear but rather spirals back and forth weaving concepts in and out of lessons that build overall understanding and long term retention It's no wonder that many parents have difficulty navigating this innovative mathematical and pedagogic terrain Now help is here Inspired by UCSMP's firsthand experiences with parents and teachers Everyday Mathematics for Parents will equip parents with an understanding of EM and enable them to help their children with homework the heart of the great parental adventure of ensuring that children become mathematically proficient Featuring accessible explanations of the research

based philosophy and design of the program and insights into the strengths of EM this little book provides the big picture information that parents need Clear descriptions of how and why this approach is different are paired with illustrative tables that underscore the unique attributes of EM Detailed guidance for assisting students with homework includes explanations of the key EM concepts that underlie each assignment Resources for helping students practice math more at home also provide an understanding of the long term utility of EM Easy to use yet jam packed with knowledge and helpful tips Everyday Mathematics for Parents will become a pocket mentor to parents and teachers new to EM who are ready to step up and help children succeed With this book in hand you ll finally understand that while this may not be the way that you learned math it s actually much better

730 Daily Math Warm-Ups Hope Martin,1996 This versatile economical book gives you two intriguing math riddles for every day of the year Each puzzle highlights an interesting person or event associated with that particular day Students guess the year based on mathematical clues such as The square root of my tens digit is equal to my units digit In solving the puzzles students work with a wide range of math concepts and functions They interpret quantitative clues use context clues to problem solve and connect abstract number theory to a fun activity
