Getting to the Core of Literacy for History/Social Studies, Science, and Technical Subjects, Grades 6–12 Vicky Giouroukakis, Maureen Connolly, 2013-05-14 Literacy is not just for English teachers anymore. The new Common Core English Language Arts Standards aren't just for English teachers. Fluent reading and writing are critically important to the study of history, social studies, science, and technical subjects too. What's more, the progress your students make is directly tied to their ability to process information they read and to express their ideas in writing. So how do you make literacy a focus of your teaching without taking time away from essential content? This practical resource, packed with teacher-tested CCSS-based sample lessons, shows you how using the Backward Design approach to set and meet your goals. Each lesson template includes the teaching strategies you'll utilize, ways to incorporate technology and media, variations for differentiation and interdisciplinary connections, links to the work of major educational theorists. Following these models, you'll set the CCSS in your sights and develop lessons that both meet standards and fit your classroom. Before you know it, you'll be infusing reading and writing across your curriculum in purposeful and meaningful ways.

The Mathematics Lesson-Planning Handbook, Grades K-2 Beth McCord Kobett, Ruth Harbin Miles, Lois A. Williams, 2018-02-09 This book brings together the best of Visible Learning and the teaching of mathematics. The chapters on learning intentions, success criteria, misconceptions, formative evaluation, and knowing thy impact are stunning. Rich in exemplars grounded in research about practice and with the right balance about the surface and deep learning in math, it's a great go-to book for all who teach mathematics. John Hattie, Laureate Professor, Deputy Dean of MGSE, Director of the Melbourne Education Research Institute, Melbourne Graduate School of Education. Your blueprint to planning K-2 math lessons for maximum impact and understanding. Not sure of tomorrow morning's lesson plan? Or maybe you feel it isn't tailored enough for your students' needs? What do you do? For that and more help is here. *The Mathematics Lesson Planning Handbook: Grades K-2: Your Blueprint for Building Cohesive Lessons* guides teachers step by step through the decision-making process of planning K-2 math lessons that are purposeful, rigorous, and coherent. Instructional experts Beth McCord Kobett, Ruth Harbin Miles, and Lois A. Williams streamline and deepen the lesson planning process, showing teachers how to assess students' complex needs, clarify learning intentions, and select tasks that will best lead to student understanding of mathematical concepts and skills. Along the way, teachers create an individualized blueprint for planning K-2 math lessons for maximum student learning. The lesson planning process guides teachers to identify the mathematical content, language, and social learning intentions for a lesson or unit and connect goals to success criteria. Determine the purpose of a math lesson you're planning by distinguishing between conceptual understanding, procedural fluency, and transfer. Select worthwhile tasks and materials that make the best use of representations, manipulatives, and other instructional tools and resources. Choose the format of your lesson using reasoning and number routines, games, whole-class discussion, and pairs or small-group work. Anticipate student misconceptions and

evaluate understanding using a variety of formative assessment techniques Decide how you'll launch your lesson facilitate questioning encourage productive struggle and close your lesson Included is a lesson planning template and examples from kindergarten first and second grade classrooms Chapter by chapter the decision making strategies empower teachers to plan math lessons strategically to teach with intention and confidence and to build an exceptional foundation in math for all students

Who Are You Who Are So Wise in the Science of Teaching? Rex R. Schultze J.D.,2021-02-10 Based upon years of reviewing the work product of building principal s evaluations of their teaching staff it has been evident to me there is a clear need to improve this critical aspect of school administration This book is designed to provide building principals and assistant principals with guidance on 1 the necessary preparation of the principal to be effective at guiding and coaching their staff 2 the laying of the foundation for their teachers to know the standard of performance expected by the school district as whole and the specific building where they serve guide and teach their students 3 the teaching of their instructional staff what constitutes good lesson planning and instruction as defined by the educational model adopted by the school and art of teaching under that model 4 developing the skills for the writing of effective teacher formative and summative evaluations to assist in the improvement of instruction and 5 the work required in 1 to 4 above to establish and qualify the principal as an expert witness under the Rules of Evidence if he she is called upon to participate in the end game of moving an underperforming teacher along The book is designed as a step by step process with reading assignments and self instruction tasks at the end of each chapter applying the concepts teaching supporting and assisting teachers in the science of teaching needed to develop maintain and excel at their craft It is

shown scientifically that where teachers know the district's standards of performance student learning improves and students learn how to learn essential in today's ever-changing society. Being an effective building principal thus requires you to be an expert in your field, i.e., that person who is rhetorically asked "Who are you who are so wise in the science of teaching?"

About the Author: As you will surmise quickly in reading this book, Rex Schultze has had the fortunate circumstance of being immersed in public education for his entire life from 1951 to the present as a teacher's and administrator's kid, as a high school teacher for four years, as the brother of an elementary school teacher and administrator, and as a lawyer with a 40-year practice focused on public education both K-12 and community college levels. As such, he brings to you in "Who are you who are so wise in the science of teaching?" a lifetime of perspective on the value of an education and particularly public education, the most important equalizer of the citizens of our country, and the need to grow, support, and nurture the best teachers possible. Rex is a Boomer, as in Baby Boomer. OK, Boomer, an early version of that generation that grew up in the 50s and 60s, so you will find references to the movies and music of those days throughout the book to add perspective and some fun. Apologies in advance for the succeeding generations; you can Google the references, a contribution by Rex to your personal history journey.

Teaching the Language Arts Denise Johnson, Elizabeth Dobler, Thomas DeVere Wolsey, 2022-09-30. This eBook version includes the following enhancements: interactive features and links to the up-to-date Companion Website with more strategies and examples of practice and student work. This book's unique and engaging voice, supported by its many resources, will help future and in-service teachers bring the language arts to life in their own classrooms. This book helps readers envision their future classrooms, including the role technology will play as they prepare to be successful teachers. Comprehensively updated, the second edition addresses new demands on teaching in traditional and virtual ELA classrooms and the new ways technology facilitates effective instructional practices. Organized around the receptive language arts (the way learners receive information) and the expressive language arts (the way learners express ideas), chapters cover all aspects of language arts instruction, including new information on planning and assessment, teaching reading and writing fundamentals, supporting ELLs, dyslexic, and dysgraphic learners, using digital tools, and more. In every chapter, readers can explore a rich array of teaching tools and experiences which allow readers to learn from real-world classrooms.

Graphing Calculator Strategies Donna Erdman, 2006-12-01. Integrate TI Graphing Calculator technology into your mathematics instruction with these resource books. Lesson plans are easy to follow, and each lesson explains the concepts, demonstrates how to use the calculator, and applies the concept. Differentiate instruction with Extension Ideas and strategies that simplify the lessons for students needing extra support. Teacher Resource CD includes a Using the Calculator section to help students visualize the concepts, great for English language learners. Practice pages help prepare students for testing situations that include the use of graphing calculators.
