Abstract: Abstracts of 100 articles published in 1999 in the *Journal of Management Education* were analyzed to determine the frequency of use of the terms "diversity" and "diversity management." The results indicate that the term "diversity" was used more frequently than "diversity management" and that the use of both terms increased over the years. The results also indicate that the use of the term "diversity" was more frequent in articles published in the United States than in articles published in other countries.
