

WINCH

Your crawler may be equipped with a John Deere No. 1225 Power Winch. This winch is driven from the rear of the crawler and has a separate hydraulic control.

No. 1225 Power Winch

The Power Winch affords increased convenience and ease of operation. A self-contained hydraulic pump combined with a speed governor valve provides the force required to operate the clutch and brake mechanisms with minimum of operator effort.

To operate the winch, start the engine (see 5) and allow it to warm up properly. Adjust the engine speed from 1200 rpm to 1500 rpm. The winch may be operated at any speed in this range.

Since the winch is driven by the powershaft, the winch drive or PTO lever must be engaged before the winch can be operated (see page 22).

WINCH CONTROL LEVER

The winch control lever is located to the side of the operator's seat. The lever has three positions: **WIND**, **WIND**, and **WIND**.

When the control lever is in the center position, the winch is in the "WIND" position. In this position, the winch brake prevents the cable from from rotating.

To release the cable, move the control lever rearward to the "WIND" position. This allows the cable drum to "free-spin" and rotate.

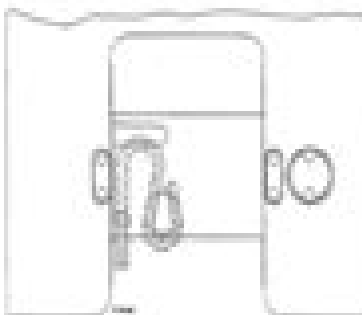

Power Winch Control Lever

By the "WIND" position, the control lever will remain in the "WIND" position until released when it will automatically return to the "WIND" position.

To wind in the cable, push the lever forward to the "WIND" position. The winch will continue to wind until the lever is released. The engine speed can be varied between 1200 rpm and 1500 rpm to regulate the winch winding speed. When the control lever is released, the winch will return to the "WIND" position.

ATTACHING CABLE TO WINCH DRUM

Attaching Cable to Winch Drum

Thread cable through winch drum, feed end of cable back into drum, and press it in.

SAFETY RULES

Never leave the machine unattended with the engine running.

Always lower equipment to the ground before leaving the operator's seat. When using the front 4-in-1 bucket, also raise the clam.

Never drive too close to the edge of a ditch or excavation.

Drive at speeds slow enough to insure your safety. Drive slowly over rough ground or on hillsides. Always keep crawler in gear when going down steep grades.

Do not wear loose clothing near moving parts. Never operate engine in a closed garage or shed.

Shut off engine before refueling. Never smoke while filling the fuel tank.

Never allow anyone to sit on a moving crawler or the drive equipment.

When driving out of a ditch or excavation or up a steep hillside, or when tractor is hitched to a heavy load, **ENGAGE CLUTCH SLOWLY**, and be prepared to disengage clutch promptly should the front of the crawler rise off the ground.

Releasing hydraulic oil under pressure can cause serious injury or death. To prevent this, be sure all valves and hoses are not damaged. Before disconnecting lines to the hydraulic system and before connecting remote cylinder lines, be sure to release all hydraulic pressure.

Carry the bucket as low as possible at all times, especially when working in a ditch or backing up a steep incline.

When using equipment or driving in a public road at night or during other periods of poor visibility, use working lamps to prevent a collision. Your John Deere dealer can supply you with equipment-mounted working lamps which clearly mark the "working side" of both the crawler and equipment.

Keep loading areas as level as possible.

Never lower a loaded bucket with the control lever in first position.

On units equipped with a warning radiator fan, be sure to periodically check all engine coolant parts for leaks, as coolant gases can be dangerous to the operator.

Travel slowly when working over rough terrain.

Never operate the crawler loader without the maximum recommended load of rear counterbalance weights.

Never allow anyone to work under a raised bucket.

Do not use the crawler loader as a battering ram.

When driving over rough ground or wedges or on, care should be taken to guard against injury from particles that may chip from either the pin or wedge or object used in working face. Whenever possible, protect eyes with safety glasses.

Add coolant only with engine stopped or idling. Turn radiator cap slowly to release pressure before removing.

Provide a fire-extingisher for use in case of accident, and use the proper technique to extinguish fires, etc., without delay, to prevent the possibility of infection.

Always disconnect battery ground strap before servicing engine or electrical system. This will prevent fire hazards or accidental starting.

CAUTION: Never dismount from the crawler when it is in motion. Wait until the crawler stops before dismounting.
