

Explicit Teaching

Gradual Release of Responsibility

Student
Teacher

Activate prior learning/ Build field knowledge

Present, explain and discuss the learning intention & the success criteria

When: Teacher's activates students' prior knowledge, language and experience

How: Build students' knowledge of the field by explicitly teaching the language associated with the task. This includes both 'social' and 'academic' language

Why: Students' understanding of the learning context and the vocabulary is essential to access and understand the explicit teaching that will follow in the following phases

Model and deconstruct

Model the learning intention and the success criteria

When: Teachers deconstruct the model using clear, scaffolded explanations.

How: Provide and deconstruct models and/or graphic organisers to represent the language, thinking and organisational strategies

Use 'think alouds' to explicitly model the strategies and language used when deconstructing the model.

Why: A shared metalinguage needs to be developed and gradually built up to enable participation, access and engagement in later phases

Joint construction

Model the learning intention and the success criteria

When: Teachers scaffold students' partial responses into complete ideas.

How: Model the thinking and organisational strategies that are required to demonstrate the knowledge/skill

Why: The vocabulary and metalinguage introduced in the earlier phases is further consolidated and contextualised during joint construction. This language is essential for engagement in remaining phases.

Supported practice

Model the learning intention and the success criteria

When: Teachers provide task oriented feedback.

How: Listen to how students talk about the task, watch how they work and probe into their thinking using prompts. Prompts encourage the student to think deeply about their performance and apply the feedback to demonstrate the success criteria.

Why: Students develop their proficiency by registering the task orientated feedback and then refining their practice.

Independent practice

Assess the learning intention against the success criteria

When: Students independently apply their learning to new individual or group tasks.

How: Any feedback in this phase must place responsibility on the student to improve and correct their work

Why: Through practice students develop their automaticity, fluency and comprehension strategies to complete a related task

Share and reflect

Students monitor and assess their own capability to demonstrate mastery

When: Teachers provide explicit feedback to students about their performance against the success criteria

When: Students and groups share their strategies and insights

How: Students reflect on their performance against the success criteria

Why: Students connect their next learning steps to current performance
