PÃ©rez LÃ³pez, The economic crisis of the 1990s has propelled the second economy from behind the scenes to center stage Not only have black markets mushroomed but second economy activities connected to the free market that the Castro government has traditionally discouraged or even prosecuted are now being incorporated into the government s own economic strategy Self employment cultivation of individual plots and the use of foreign currencies to buy or sell goods are now promoted with considerable enthusiasm by the leadership *Corruption in Cuba* Sergio DÃ­az-Briquets,Jorge F. PÃ©rez-LÃ³pez,2010-06-28 While Fidel Castro maintained his longtime grip on Cuba revolutionary scholars and policy analysts turned their attention from how Castro succeeded and failed to how Castro himself would be succeeded by a new government Among the many questions to be answered was how the new government would deal with the corruption that has become endemic in Cuba Even though combating corruption cannot be the central aim of post Castro policy Sergio D az Briquets and Jorge P rez L pez suggest that without a strong plan to thwart it corruption will undermine the new economy erode support for the new government and encourage organized crime In short unless measures are taken to stem corruption the new Cuba could be as messy as the old Cuba Fidel Castro did not bring corruption to Cuba he merely institutionalized it Official corruption has crippled Cuba since the colonial period but Castro s state run monopolies cronyism and lack of accountability have made Cuba one of the world s most corrupt states The former communist countries in Eastern Europe were also extremely corrupt and analyses of their transitional periods suggest that those who have taken measures to control corruption have had more successful transitions regardless of whether the leadership tilted toward socialism or democracy To that end D az Briquets and P rez L pez both Cuban Americans do not advocate any particular system for Cuba s next government but instead prescribe uniquely Cuban policies to minimize corruption whatever direction the country takes after Castro As their work makes clear averting corruption may be the most critical obstacle in creating a healthy new Cuba *Handbook of Nonlinear Optical Crystals* Valentin G. Dmitriev,Gagik G. Gurzadyan,David N. Nikogosyan,2013-04-17 Four years ago when we had finished our work on the first edition of our Handbook we didn t even suppose that three years later it would become necessary to greatly revise and

update the material It happened because of the following developments 1 The invention and tremendous development of modern nonlinear optical crystals such as BBO LBO KTP ZnGeP etc 2 2 Rapid progress in laser techniques femtosecond CPM laser Ti sapphire laser diode pumped solid state lasers etc 3 The appearance of numerous organic crystals which can be synthesized with predictable properties 4 Progress in the theory of nonlinear frequency conversion utilizing biaxial crystals femtosecond pulses etc 5 Accumulation of new data on the properties of nonlinear optical crystals In accordance with the above we have made many changes in the text The first chapter was revised by D N Nikogosyan the second one by V G Dmitriev and D N Nikogosyan and the fourth one by G G Gurzadyan The third chapter containing the main reference material on 77 nonlinear optical crystals was completely rewritten and updated by D N Nikogosyan The Appendix containing the list of most commonly used laser wavelengths was compiled by D N Nikogosyan We would appreciate any valuable comments and recommendations that will allow us to further improve the Handbook We would like to thank H K V Lotsch for fruitful and long lasting cooperation

Cuba's Second Economy Jorge Perez-Lopez, 2018-02-06 Without doubt Cuba is facing its most serious economic challenge in nearly thirty five years of revolutionary rule There is consensus that as the official centrally planned economy has faltered ordinary citizens eke out a living only by engaging in under the table unrecorded and mostly illegal activities In fact this second economy is growing by leaps and bounds This volume sketches the contours of the very complex phenomenon of the second economy of socialist Cuba and discusses its evolution over time as well as the role that it may play in the transition to a market economy on the island The economic crisis of the 1990s has propelled the second economy from behind the scenes to center stage Not only have black markets mushroomed but second economy activities connected to the free market that the Castro government has traditionally discouraged or even prosecuted are now being incorporated into the government's own economic strategy Self employment cultivation of individual plots and the use of foreign currencies to buy or sell goods are now promoted with considerable enthusiasm by the leadership Perez Lopez examines different ways of thinking about unregulated economic activities that have been set forth in the literature and concludes that the concept of the second economy is the most appropriate for Cuba He brings together available information from a multitude of sources on the manifestations of the second economy in Cuba and of its operation Cuba's Second Economy is a timely study of an economic system in crisis It will be of interest to economists political scientists policymakers and Latin America area scholars
