- 1 Describe the purpose of the statement of cash flows.
- 2 Identify the major classifications of cash flows.
- 3 Prepare a statement of cash flows.
- 4 Differentiate between net income and net cash flow from operating activities.
- 5 Determine net cash flows from investing and financing activities.
- 6 Identify sources of information for a statement of cash flows.
- 7 Contrast the direct and indirect methods of calculating net cash flow from operating activities.
- 8 Discuss special problems in preparing a statement of cash flows.
- 9 Explain the use of a worksheet in preparing a statement of cash flows.

Show Me the Money!

Investors usually look to net income as a key indicator of a company's financial health and future prospects. The following graph shows the net income of one company over a seven-year period.

The company showed a pattern of consistent profitability and even some periods of income growth. Between years 1 and 4, net income for this company grew by 32 percent, from \$31 million to \$41 million. Would you expect its profitability to continue? The company had consistently paid dividends and interest. Would you expect it to continue to do so? Investors answered these questions by buying the company's shares. Eighteen months later, this company—**W. T. Grant (USA)**—filed for bankruptcy, in what was then the largest bankruptcy filing in the United States.

How could this happen? As indicated by the bottom line in the graph, the company had experienced several years of negative cash flows from its operations even though it reported profits. How can a company have negative cash flows while reporting profits? The answer lays partly in the fact that W. T. Grant was having trouble collecting the receivables from its credit sales, causing cash flow to be less than net income. Investors who analyzed the cash flows would have been likely to find an early warning signal of W. T. Grant's operating problems.
