**Portals of Promise** Debbie Pushor, the Parent Engagement Collaborative the Parent Engagement Collaborative, 2013-10-30 Working with parents is a significant aspect of educators roles yet it is rare to find curriculum in teacher education programs designed to prepare individuals to consider in philosophical theoretical and pedagogical ways who they will be in relationship with parents and why Schools therefore remain hierarchical structures in which parents are marginalized in relation to decisions affecting teaching and learning This book begins with Pushor s conceptualization of a curriculum of parents a curriculum which explores beliefs and assumptions about parents a vision for education in which educators work alongside parents and family members in the learning and care of children and a desire for reform She describes a curriculum of parents in the form of three graduate teacher education courses which she lived out in relationship with students Graduate students then capture their experiences immersed in this curriculum what they each took up how it shaped their knowledge attitudes and practices and how they lived it out as they returned to their classrooms schools and early learning centres This book is a storied account of their intense immersion in a curriculum of parents and the resulting impact living that curriculum has had on who they are in relation to parents and families It is an honest and vulnerable account of their shared and individual journeys They puzzle over the complexities and the successes of their work and the resulting impact This is not a book of best practice but an invitation to other educators to consider as they did what they do and how it could be different

**What Is the Meaning of Life... Life Lessons** Debbie Bryan, 2015-11-10 You dont realize that you are different and not a part of the normal awareness which resides in many sentient beings You are born aware of your gifts but without understanding that anything is unusual because they are so natural and free flowing As a young child I would have dreams that would always come true later on I would dream about a happening but I wouldnt tell my family about it until after the event actually took place Because I waited until after the fact to tell my parents about my dream they would just smile laugh at me and shake their heads as they went along with their day I never knew I was different from other people by being born with gifts My parents non reactive responses were exactly what I needed to allow me to keep my self confidence and not turn the dreams and visions away

**Unequal Lessons** Alexandra Freidus, 2025-08-05 Diversity and racial integration efforts are not sufficient to address educational inequality New York City schools are among the most segregated in the nation Yet over seven decades after the Brown v Board of Education decision New Yorkers continue to argue about whether school segregation matters Amid these debates Alexandra Freidus dives deep into the roots of racial inequality in diversifying schools asking how we can better understand both the opportunities and the limits of school diversity and integration Unequal Lessons is based on six years of observations and interviews with children parents educators and district policymakers about the stakes of racial diversity in New York City schools The book examines what children learn from diversity exploring both the costs and benefits of school integration By drawing on students first hand experiences Freidus makes the case that although a focus on diversity offers many benefits to students it often reinscribes rather than diminishes existing inequalities in school policy and practice The idea of diversity for its own sake is frequently seen as the solution with students of color presumed to benefit from their experiences with white students while schools fail to address structural inequality Though educators and advocates often focus on diversity out of a real desire to make a positive difference in students lives this book makes clear the gaps between good intentions and educational injustice

Lessons from a Complex Child Ellen Woodbriar, 2020-09-21 At twenty nine months my son Jackson had met all of his developmental milestones He spoke in full sentences knew his ABCs and colors had well developed fine and gross motor skills was affectionate had perfect eye contact loved to talk and was extremely social Six months later just after Jackson s third birthday neurologists couldn t rule out that he might have a malignant form of epilepsy some form of neurodegenerative disorder have regressive encephalopathy be autistic or have a pervasive developmental disorder PDD What could possibly have caused the regression he experienced over a four month period the irritability he was exhibiting the sixty to eighty seizures he was enduring each day and the autistic like behaviors he had developed Although I m not a physician and don t work in the healthcare profession I have lived through the regression and recovery of my own child This experience has led me to form the opinion that potentially too many children are being put on the autism spectrum Some children like Jackson with ASD like symptoms are not autistic and therefore are not receiving the full breadth of intervention that could potentially help them recover Do I have proof of this No because from my experience and up until this point there has not been enough research that the medical profession recognizes as reliable made available to the public or to parents like me to identify the root cause of some symptoms The purpose of my telling this
