Hydraulic Fracturing Impacts and Technologies Venki Uddameri, Audra Morse, Kay J. Tindle, 2015-06-22 Hydraulic Fracturing Impacts and Technologies A Multidisciplinary Perspective serves as an introduction to hydraulic fracturing and provides balanced coverage of its benefits and potential negative effects Presenting a holistic assessment of hydraulic fracturing and its environmental impacts this book chronicles the history and development of un *Pathways to Reform* Alexandra W. Logue, 2017-09-08 A personal account of the implementation of a controversial credit transfer program at the nation s third largest university Change is notoriously difficult in any large organization Institutions of higher education are no exception From 2010 to 2013 Alexandra Logue then chief academic officer of The City University of New York led a controversial reform initiative known as Pathways The program aimed to facilitate the transfer of credits among the university s nineteen constituent colleges in order to improve graduation rates a long recognized problem for public universities such as CUNY Hotly debated Pathways met with vociferous resistance from many faculty members drew the attention of local and national media and resulted in lengthy legal action In Pathways to Reform Logue the figure at the center of the maelstrom blends vivid personal narrative with an objective perspective to tell how this hard fought plan was successfully implemented at the third largest university in the United States Logue vividly illustrates why change does or does not take place in higher education and the professional and personal tolls exacted Looking through the lens of the Pathways program and factoring in key players she analyzes how governance structures and conflicting interests along with other institutional factors impede change which Logue shows is all too rare slow and costly In this environment she argues it is shared governance combined with a strong central decision making authority that best facilitates necessary reform Logue presents a compelling investigation of not only transfer policy but also power dynamics and university leadership Shedding light on the inner workings of one of the most important public institutions in the nation Pathways to Reform provides the first full account of how despite opposition a complex higher education initiative was realized All net royalties received by the author from sales of this book will be donated to The City University of New York to support undergraduate student financial aid Research in Chemistry Education Liliana Mammìno, Jan Apotheker, 2021-05-17 This volume emphasizes the role of chemical education for development and in particular for sustainable development in Africa by sharing experiences among specialists across the African continent and with specialists from other continents It considers all areas and levels of chemistry education gives specific attention to known major challenges and encourages explorations of novel approaches The chapters in this book describe new teaching approaches approach explorations and in class activities analyse educational challenges and possible ways of addressing them and explore cross discipline possibilities and their potential benefits for chemistry education This makes the volume an up to date compendium for chemistry educators and educational researchers worldwide Assessing Austrian Economics Daniel J. D'Amico, Adam G. Martin, 2019-10-28 Here leading economists explore

whether Austrian economics is still relevant today Starting with Peter Boettke s lead essay What is Wrong with Austrian Economics chapters include an array of perspectives responding to this question ranging from economics to intellectual history to political science and to philosophy

Coastal Altimetry Stefano Vignudelli,Nurul Hazrina Idris,2023-06-27 Coastal Altimetry Selected Case Studies from Asian Shelf Seas provides information on developments over the past decade in the processing of remotely sensed altimetry in coastal areas with an overview of expected errors and where they stem from along with remaining gaps in processing Challenges covered include the retracking of the altimetric signal to account for land contamination tropospheric water corrections and tidal model improvements along with the pros and cons of widely available products Additional chapters provide recent research in the regional seas of Asia and cover variability dynamics predictability and prediction impacts of extreme events effects to ecosystems and more This book offers readers a dataset that can illuminate our understanding of the propagation of planetary boundary waves that have a significant sea level signal in near coastal regions As such researchers and students who have a foundation in satellite altimetry and want to know the latest development of open ocean and coastal satellite altimetry especially in Asian coastal regions will benefit from this book Presents the advancement of coastal altimetry technologies from various dedicated experts Includes case studies throughout to give real life examples that can be implemented globally Provides chapters that include summaries of key points and an outlook to the future

Interpreting Soil Test Results Pam Hazelton,Brian Murphy,2025-05 Interpreting Soil Test Results is a practical reference enabling soil scientists environmental scientists environmental engineers land holders and land managers to understand and interpret soil results In this new edition the entire acid sulfate soil section has been replaced with the most current information The interpretation of some soil chemistry tests has been updated such as soil phosphorus values based on phosphorus buffering capacity the influence of sparingly soluble salts and chloride on interpreting salinity data and EC values and some critical values for soil chloride levels added The sodicity section has been revised to include the latest information and understanding of sodicity The soil organic carbon section now includes the latest information and understanding on soil organic carbon Intensive sampling in small areas and a new section on pipeline corrosion have been added The soil contamination chapter has been revised providing the latest understanding and critical values and a new section on PFAS chemicals added Interpreting Soil Test Results is an important reference for students of soil science environmental science and environmental engineering as well as for professional soil scientists environmental scientists engineers and consultants and for local government agencies It also offers a reference for legal professionals in land and environment cases

Recursion David J. Lobina,2017-07-21 This book provides a comprehensive account of the role of recursion in language in two distinct but interconnected ways First David J Lobina examines how recursion applies at different levels within a full description of natural language Specifically he identifies and evaluates recursion as a a central property of the computational system underlying the faculty of language b a possible feature of the derivations yielded by

this computational system c a global characteristic of the structures generated by the language faculty and d a probable factor in the parsing operations employed during the processing of recursive structures Second the volume orders these different levels into a tripartite explanatory framework According to this framework the investigation of any particular cognitive domain must begin by first outlining what sort of mechanical procedure underlies the relevant capacity including what sort of structures it generates Only then the author argues can we properly investigate its implementation both at the level of abstract computations typical of competence level analyses and at the level of the real time processing of behaviour
