## 8-6: Renting vs. Cheating

- What is a mortgage?

A mortgage is a legal agreement by which a bank or other lender provides funds (money) to someone in exchange for selling their real estate's property. Using this principle, the ownership of the real-estate is sold upon the payment of other debts. Therefore that gives the mortgagee (lender) the following suggestion, "you don't receive another mortgage money getting financial gain" mortgage is very much like a loan which is different from sale of house or other financial investments."

- What is a mortgage? Is it a loan or not?

A mortgage is a loan which is made to someone in exchange for selling their mortgage house property and upon completion of the validity of the loan (i.e. when the house is sold) property of a person is given to the lender and the lender can take all the money of the person who is selling the house.

- What are the advantages of renting vs. owning a house? What are the disadvantages?

**Owning Versus Renting** Neil H. Buchanan,2012 This document gathers together 22 essays that were originally published as online commentary by Professor Neil H Buchanan between 2008 and 2012 All but one of the essays first appeared on the Dorf on Law blog In these essays Professor Buchanan discusses the arguments for and against government support of individual home ownership Most of the essays focus on how to move away from the model of individual ownership The latter essays however begin to embrace the possibility that home ownership incentives should be expanded to mitigate the current upside down quality of those subsidies and to preserve middle class professional jobs These essays were also included in the continuing legal education materials for the Teaching Tax session at the 2012 Joint Fall CLE meeting of the ABA Sections of Taxation and RPTE in Boston on September 14 2012

**Renting Versus Owning and the Role of Income Risk** Rainer Schulz,Martin Wersing,Axel Werwatz,2009 In a world with complete markets and no transactions cost the decision whether to rent or buy a home is separate from a household s professional income risk If markets are incomplete and have frictions however profession specific income risk regional house price risk and mobility needs will interact and should affect the tenure mode choice Using panel data from West Germany we establish homogeneous profession groups and estimate their regional net income risk and regional mobility We then examine the impact of the risk and mobility variables on the tenure mode decision at the aggregate and the individual household level We find that the diversification potential of renting affects the tenure mode choice as do mobility needs Tenure mode choice background risk household mobility

**Renting Versus Owning and the Role of Human Capital** Rainer Schulz,2014 In a world with complete markets the decision whether to rent or buy a home is not influenced by risks related to human capital If markets are incomplete and have frictions however this may change Renting should become more likely the more mobile a household has to be and the more income risk can be diversified Using household panel data from Germany we test both predictions We find that mobility requirements have a positive effect on the probability of renting This effect is robust even after controlling for state dependence unobserved heterogeneity and other factors known to influence the tenure mode choice Our data however does not support the hypothesis that potential to diversify net risk income when renting affects the tenure mode choice
