Student Exploration: Unit Conversions 2 – Scientific Notation and Significant Digits

[Note to teachers and students: This lesson is designed to be a follow-up to the Unit Conversions Student Exploration sheet. The same Gizmo is used for both activities.]

Directions: Follow the instructions to go through the simulation. Respond to the questions and prompts in the orange boxes.

Vocabulary: resolution, scientific notation, significant digits

Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

Philip measures a room using his feet. (His feet are each about a foot long.) He estimates the room measures about ten and a half feet by thirteen and a half feet. He calculates the room's area to be: $10.5' \times 13.5' = 141.75 \text{ ft}^2$.

1. Which do you think is the best description of the area of the room? Highlight your choice.

- A. The room's area is exactly 141.75 ft^2 . B. The room's area is about 142 ft^2 .

2. Explain your choice:

I chose B because he didn't use an accurate device for measuring the room.

Gizmo Warm-up

When scientists report a value, they have to take several things into consideration. Sometimes values are very large or small. In this case, scientists can use shorthand called **scientific notation** to report the value. Scientists also must consider how precise their value is. The precision of a measurement can be shown by the number of **significant digits** in the value.

To begin, check that the Burj Khalifa question is shown. Drag the three tiles shown below to determine the tower's height in micrometers. The answer is given in scientific notation.

$$0.828 \text{ Kilometers} \times \frac{1000 \text{ meters}}{1 \text{ Kilometer}} \times \frac{1000 \text{ millimeters}}{1 \text{ meter}} \times \frac{1000 \text{ micrometers}}{1 \text{ millimeter}} = 8.28 \times 10^8 \text{ micrometers}$$

1. The Burj Khalifa is 828,000,000 micrometers tall. How is this value written in scientific notation in the Gizmo™? 8.28×10^8

2. In a value, any non-zero digit is considered a significant 'cross-hair' (or 'grain'). What is the minimum number of significant digits in 828,000,000? 3
