factor

Carrying Capacity

- It is the number of individuals that can be supported by the environment
- It is the maximum number of individuals that can be supported by the environment

**Carrying Capacity** is the number of individuals in a population per unit of space. Factors limiting growth are density-dependent, which are directly related to carrying capacity. These limiting factors are known as **Density-Dependent Factors**.

**Question:** How does a density-dependent limiting factor affect carrying capacity?

1. **Challenge:** What do you think would happen if a density-dependent limiting factor changed?

Population would increase

2. **Challenge:** Suppose a drought led to a half-year of water scarcity, leaving less water available for cattle. How do you think this would affect carrying capacity?

Capacity will decrease because there will be a shortage of water for the cattle.

3. **Challenge:** How do you think the carrying capacity will change if the number of cattle available for the spring increases?

Factor

4. **Challenge:** How do you think the amount of space available in the cattle affect how many individuals the environment can support?

The more the space available the more the cattle population will be.

5. **Challenge:** What do you think limiting a population's space decreases the carrying capacity?

The carrying capacity of the environment will decrease.

6. **Challenge:** What do you think would happen if another density-dependent limiting factor changed?
