United States Government: Democracy in Action (Student Edition) Glencoe/McGraw-Hill,2000-10 *Educating Democratic Citizens in Troubled Times* Janet S. Bixby,Judith L. Pace,2014-03-14 This book offers a groundbreaking examination of citizenship education programs that serve contemporary youth in schools and communities across the United States These programs include social studies classes and curricula school governance and community based education efforts The book takes an interdisciplinary approach to exploring the experiences and perspectives of educators and youth involved in these civic education efforts The contributors offer rich analyses of how mainstream and alternative programs are envisioned and enacted and the most important factors that shape them A variety of theoretical lenses and qualitative methodologies are used including ethnography focus group interviews and content analyses of textbooks United States Government Richard C. Remy,1993 **Glencoe. United States Government** Richard C. Remy,2010 **World Yearbook of Education 2011** Lyn Yates,Madeleine Grumet,2011-02-01 How do curriculum conceptions of knowledge and the schooling experiences of young people engage the great issues of this tumultuous time Curriculum is always influenced by the events that shape our world but when testing and bench marking preoccupy us we can forget the world that is both the foundation and the object of curriculum This edited volume brings together international contributors to analyze and reflect on the way the events of the last decade have influenced the curriculum in their countries As they address nationalism in the face of economic globalisation the international financial crisis immigration and the culture of diaspora they ask how national loyalties are balanced with international relationships and interests They ask how the rights of women and of ethnic and racial groups are represented They ask what has changed about history and civics post 9 11 and they ask how countries that have experienced profound political and economic changes have addressed them in curriculum These interactions and changes are a subject of particular interest for an international yearbook in that they are almost always permeated by global movements and influenced by multinational bodies and practices And as these essays show in curriculum global and international issues are explicitly or implicitly also about local and national interests and about how citizens engage their rights and responsibilities This volume brings together a new approach to perspectives on curriculum today and a new collection of insights into the changes from different parts of the world which discuss How is the world represented in curriculum How do responses to world events shape the stories we tell students about who they are and can be This book will be of great benefit to educational researchers and policy makers as well as undergraduate and postgraduate students

United States Government: Presidential Election Edition Richard C. Remy,1997-02 My goal in writing this book is to help you develop the knowledge skills and ideals you need to protect your own freedom to keep democracy alive in the United States In the pages that follow you will find information to help you better understand how the machinery of representative government works and why it sometimes does not work You will have the chance to develop skills for making sound

Social Structure and Voting in the United States Robert B. Smith,2016-03-09 This book analyzes practical and moral influences on voting decisions Undermining the widespread assumption that economic self interest is the key determinant of voting choices it discovers that moral considerations rooted in religious traditions are often the more decisive This finding is confirmed through a close analysis of tangible problems such as child neglect and crime problems which one would expect to trouble practical voters Further this book suggests that political ideologies influence party affiliation rather than the other way around It defines four categories of states in terms of human development and income equality South Heartland postindustrial and balanced It then explains why political color red purple or blue and societal problems vary across these categories Voters moral ideologies it shows combine with a state s measure of income equality and human development to shape a state s readiness to pursue practical solutions to societal problems Finally it shows that moral ideologies of the religious right and authoritarianism two very different concepts are in fact intertwined empirically This book thus suggests that education a key driver of human development anti authoritarianism and deliberative voting should begin in preschools that are both nurturant and instructive
