Coal and Coalbed Gas Romeo M. Flores, 2013-10-19 Bridging the gap in expertise between coal and coalbed gas subfields in which opportunities for cross training have been nonexistent *Coal and Coalbed Gas* sets the standard for publishing in these areas This book treats coal and coalbed gas as mutually inclusive commodities in terms of their interrelated origin accumulation composition distribution generation and development providing a balanced understanding of this energy mix Currently considered a non renewable energy resource coalbed gas or coalbed methane is a form of natural gas extracted from coal beds In recent years countries have begun to seek and exploit coal for its clean gas energy in an effort to alleviate environmental issues that come with coal use making a book on this topic particularly timely This volume takes into account processes of coalification gasification and storage and reservoir characterization and evaluation and looks at water management and environmental impacts as well Covers environmental issues in the development of coalbed gas Includes case studies field guides and data examples and analytical procedures from previous studies and investigations Accessible by a large multidisciplinary market by one of the world's foremost experts on the topic

The Return of Bipolarity in World Politics Øystein Tunsjø, 2018-02-27 Since the collapse of the Soviet Union the international system has been unipolar centered on the United States But the rise of China foreshadows a change in the distribution of power Øystein Tunsjø shows that the international system is moving toward a U S China standoff bringing us back to bipolarity a system in which no third power can challenge the top two *The Return of Bipolarity in World Politics* surveys the new era of superpowers to argue that the combined effects of the narrowing power gap between China and the United States and the

widening power gap between China and any third ranking power portend a new bipolar system that will differ in crucial ways from that of the last century Tunsj expands Kenneth N Waltz s structural realist theory to examine the new bipolarity within the context of geopolitics which he calls geostructural realism He considers how a new bipolar system will affect balancing and stability in U S China relations predicting that the new bipolarity will not be as prone to arms races as the previous era s that the risk of limited war between the two superpowers is likely to be higher in the coming bipolarity especially since the two powers are primarily rivals at sea rather than on land and that the superpowers are likely to be preoccupied with rivalry and conflict in East Asia instead of globally Tunsj presents a major challenge to how international relations understands superpowers in the twenty first century
