The Globalization of Inequality François Bourguignon, 2017-01-24 Why national and international equality matter and what we can do to ensure a fairer world In *The Globalization of Inequality* distinguished economist and policymaker François Bourguignon examines the complex and paradoxical links between a vibrant world economy that has raised the living standard of over half a billion people in emerging nations such as China India and Brazil and the exponentially increasing inequality within countries Exploring globalization's role in the evolution of inequality Bourguignon takes an original and truly international approach to the decrease in inequality between nations the increase in inequality within nations and the policies that might moderate inequality's negative effects Demonstrating that in a globalized world it becomes harder to separate out the factors leading to domestic or international inequality Bourguignon examines each trend through a variety of sources and looks at how these inequalities sometimes balance each other out or reinforce one another Factoring in the most recent economic crisis Bourguignon investigates why inequality in some countries has dropped back to levels that have not existed for several decades and he asks if these should be considered in the context of globalization or if they are in fact specific to individual nations Ultimately Bourguignon argues that it will be up to countries in the developed and developing world to implement better policies even though globalization limits the scope for some potential redistributive instruments An informed and original contribution to the current debates about inequality this book will be essential reading for anyone who is interested in the future of the world economy

Globalization and Inequality in Emerging Societies B. Rehbein, 2011-10-27 This volume studies the relation between globalization and inequalities in emerging societies by linking Area and Global Studies aiming at a new theory of inequality beyond the nation

state and beyond Eurocentrism **Inequality, Globalization, and World Politics** Andrew Hurrell, Ngaire Woods, 1999-04-08 Inequality is becoming an urgent issue of world politics at the end of the twentieth century Globalization is not only exacerbating the gap between rich and poor in the world but is also further dividing those states and peoples that have political power and influence from those without While the powerful shape more global rules and norms about investment military security environmental and social policy and the like the less powerful are becoming rule takers often of rules or norms they cannot or will not enforce The consequences for world politics are profound The evidence presented in *Inequality Globalization and World Politics* suggests that globalization is creating sharper more urgent problems for states and international institutions to deal with Yet at the same time investigations into eight core areas of world politics suggest that growing inequality is reducing the capacity of governments and existing international organizations to manage these problems effectively The eight areas surveyed include international order international law welfare and social policy global justice regionalism and multilateralism environmental protection gender equality military power and security Getting Globalization Right Joseph S. Tulchin, Gary Bland, 2005 *Getting Globalization Right* explores political and economic changes in seven new democracies that have in common both a movement toward greater integration with the world economy and the challenges posed by persistent or even increasing domestic economic inequalities The authors argue that without effective national policies to dampen the effects of globalization the short term impact of opening the economy has a negative effect on levels of poverty and inequality In a more positive vein however and without minimizing the difficulties involved they identify the types of social policies that can blunt or counter these negative effects They also suggest that international governance will have a growing influence on how globalization affects individual nations The up to date empirically rich case studies in the book cover the experiences of Brazil Mexico the Philippines South Africa South Korea Spain and Turkey *Globalization and Inequality* Raj Pruthi, 2006 With special reference to Developing countries **The Effect of Globalization on World Poverty and Income Inequality** Kelvin Okundaye, 2018-03-05 Bachelor Thesis from the year 2016 in the subject Politics Topic Globalization Political Economics grade 1 7 University of Mannheim language English abstract In this paper we will try to determine if any of the theoretical camps are right and if so which one We will first review current literature to clarify which arguments frame the respective pro and con attitudes towards globalization This will include theoretical approaches as well as previous studies done in the field We will then empirically analyze the issue ourselves with the newest available data To do so we will first need to establish practicable definitions of globalization poverty and inequality and then try to find relationships between these factors Lastly we will interpret our results To conclude we will summarize our findings and discuss any limitations of our research , **Globalization, Poverty and Inequality** Raphael Kaplinsky, 2013-05-13 Globalization is characterised by persistent poverty and growing inequality Conventional wisdom has it that this global poverty is residual as globalization deepens the poor will be lifted out of destitution The policies of the World Bank the IMF

and the WTO echo this belief and push developing countries ever deeper into the global economy Globalization Poverty and Inequality provides an alternative viewpoint It argues that for many particularly for those living in Latin America Asia and Central Europe poverty and globalization are relational It is the very workings of the global system which condemn many to poverty In particular the mobility of investment and the large pool of increasingly skilled workers in China and other parts of Asia are driving down global wages This poses challenges for policy makers in firms and countries throughout the world It also challenges the very sustainability of globalisation itself Are we about to witness the implosion of globalisation as occurred between 1913 and 1950 Using a variety of theoretical frameworks and drawing on a vast amount of original research this book will be an invaluable resource for all students of globalization and its effects **Global Inequalities**
