

- Eugenic health justify immigration restrictions
- Those people who refused to act upon the principles of health would demonstrate their refusal of responsibility for the self improvement and fail to understand that in the struggle for existence the laws of life were social laws as well

The emergence of a 'new health consciousness'

- Events prompting the new awareness of health;
 - The reporting of epidemiological studies focusing on chronic disease
 - The Surgeon Generals 1964 Report on Smoking
 - A growing environmental movement spurred by mounting evidence of environmental degradation
 - A flood of new findings about carcinogens in food and other products
 - A succession of environmental health crisis
 - An unprecedented period of health and safety regulation during which new hazards were identified
- On one hand environmental and occupational hazards aroused public nervousness and on the other hand people also became more concerned about lifestyle hazards and developed an interest in changing their 'at risk' behaviours.
- Several health movements helped shape the new sensibility about health;
 - The women's health movement
 - Self help
 - Natural foods movement
 - Holistic health
 - Jogging
 - Dieting
 - Fitness
- By the mid 70's health became something that everyone had to become informed about and it became the centre of middle class experience
- New health consciousness: an emerging ideological formation that defined problems of health and their solutions principally, although not exclusively, as matters within the boundaries
- It was believed that working on the self was a way to 'get ones life together'
- Health practices also attracted people who wanted to replace the declining political energy associated with the 60's.
- Personal responsibility of health became **hegemonic**.
- First the ideological effects of the redefinition of the problem of health to lifestyle and solution to personal responsibility should not be underestimated.
- Second the ideology of individual responsibility for health contributed to middle class acceptance
- Third health practices in the 70's reflected and reinforced defining features of middle class culture – individual responsibility was key
- Neoliberalism
- Health talk was related to responsibility talk
