Man's Best Friends - True Stories of the World's Most Heroic Dogs John McShane, 2012-07-27. For thousands of years men and women have known who to turn to in times of trouble: a dog. All over the world dogs have risked and often lost their lives to look after the human beings they care for. Their intelligence, devotion, and astonishing courage to help humans in distress on countless occasions almost defies belief. Their stories range from Roselle the Labrador who led her blind owner to safety from the carnage of the World Trade Centre to the legends of Balto and Togo, two of the huskies who traversed over 1 000 kilometres of snow and ice to bring life-saving medicine to an isolated town, and Swansea Jack the black Labrador who rescued almost 30 people from drowning and who had a statue erected in his honour. Many of the dogs featured in this book

have been specially trained to help humans a task they eagerly set about regardless of the physical risk they face as a result Then there are the family pets who when danger threatens react with total disregard for their own wellbeing caring only about one thing protecting the humans they love

of World War II and the presidency of Well's successor Elvis J. Stahr Jr. In 1968 when Wells was called back as interim president in 1986 Indiana University stood at the crest of a century and a half of advancement far exceeding the promise of the tiny frontier seminary of the 1820s

Walt Whitman Joel Myerson, George Parker Anderson, Julie B. Anderson, 2000 Essays on American writers whose lives and careers span the history of hard-boiled writing from its birth in American pulp magazines of the 1920s to the beginning of the twenty-first century. Characteristic of this writing is an objective viewpoint, impersonal tone, violent action, colloquial speech, tough characters, and understated style, usually but not limited to detective or crime fiction.

The True Stories of American Slaves Work Projects Administration, 2022-11-13 In *The True Stories of American Slaves* the Work Projects Administration WPA delves into the rich, often painful tapestry of African American history through firsthand accounts of former slaves. This collection produced during the Great Depression as part of the Federal Writers Project showcases the voices of individuals who endured the brutal realities of slavery and later sought to recount their experiences. The literary style is characterized by a raw authenticity preserving the dialects and expressions of its narrators, which adds a poignant texture to the narrative and creates an immersive historical context that is both engaging and enlightening. The WPA was established in the 1930s to provide jobs and stimulate the economy by employing writers, artists, and intellectuals. The initiative to collect personal narratives from former slaves stemmed from a recognition of the importance of preserving African American history and culture during a time when those voices were at risk of being silenced. This undertaking exemplifies a collective effort to confront the past and address the legacies of oppression, emphasizing the necessity of acknowledging history in the face of ongoing racial injustices. This book is essential reading for anyone interested in American history, African American studies, or the narratives that shape our understanding of identity and resilience. By providing direct access to the voices of those who lived through slavery, *The True Stories of American Slaves* serves as a powerful reminder of the complexities of history and the importance of memory in shaping a more just society.

From Hyperspace to Hypertext Christopher Leslie, 2023-09-25 This book illuminates how science fiction studies can support diversity, equity, and inclusion in science and engineering. Shortly before science fiction got its name, a new paradigm connected whiteness and masculinity to the advancement of civilization. In order to show how science fiction authors supported the social construction of these gender and racial norms and also challenged them, this study analyzes the impact of three major editors and the authors in their orbits: Hugo Gernsback, John W. Campbell Jr., and Judith Merril. Supported by a fresh look at archival sources and the author's experience teaching Science and Technology Studies at universities on three continents, this study demonstrates the interconnections among discourses of imperialism, masculinity, and innovation. Readers gain insights into fighting prejudice, the importance of the community of authors and readers, and ideas about how to challenge racism, sexism, and xenophobia in new creative work. This stimulating book demonstrates how education in science, technology, engineering, and mathematics (STEM) can be enhanced by adding the liberal arts, such as historical and literary
