The War Lawyers Craig Jones,2020-11-26 Over the last 20 years the world's most advanced militaries have invited a small number of military legal professionals into the heart of their targeting operations spaces which had previously been exclusively for generals and commanders These professionals trained and hired to give legal advice on an array of military operations have become known as war lawyers The War Lawyers examines the laws of war as applied by military lawyers to aerial targeting operations carried out by the US military in Iraq and Afghanistan and the Israel military in Gaza Drawing on interviews with military lawyers and others this book explains why some lawyers became integrated in the chain of command whereby military targets are identified and attacked whether by manned aircraft drones and or ground forces and with what results This book shows just how important law and military lawyers have become in the conduct of contemporary warfare and how it is understood Jones argues that circulations of law and policy between the US and Israel have bolstered targeting practices considered legally questionable contending that the involvement of war lawyers in targeting operations enables legitimises and sometimes even extends military violence

Earned Citizenship Michael J. Sullivan,2019-03-19 The migration and settlement of 11 million unauthorized immigrants is among the leading political

challenges facing the United States today The majority of unauthorized immigrants in the U S have been here for more than five years and are settling into American communities working forming families and serving in the military even though they may be detained and deported if they are discovered An open question remains as to what to do about unauthorized immigrants who are already living in the United States On one hand it is important that the government sends a message that future violations of immigration law will not be tolerated On the other sits a deeper ethical dilemma that is the focus of this book what do the state and citizens owe to unauthorized immigrants who have served their adopted country Earned Citizenship argues that long term unauthorized immigrant residents should be able to earn legalization and a pathway to citizenship through service in their adopted communities Their service would act as restitution for immigration law violations Military service in particular would merit naturalization in countries with a strong citizen soldier tradition including the United States The book also considers the civic value of caregiving as a service to citizens and the country contending that family immigration policies should be expanded to recognize the importance of caregiving duties for dependents This argument is part of a broader project in political theory and public policy aimed at reconciling civic republicanism with a feminist ethic of care and its emphasis on dependency work As a whole Earned Citizenship provides a non humanitarian justification for legalizing unauthorized immigrants based on their contributions to citizens and institutions in their adopted nation

China and Its Small Neighbors Sung Chull Kim,2023-03-01 In *China and Its Small Neighbors* Sung Chull Kim examines the political implications of the economic asymmetry between China and its small neighbors part of wider changes in international relations brought about by the rise of China While being critical of the current trend that focuses on the China U S rivalry alone Kim argues that a microanalysis of China s advances toward its neighbors is a guide to understanding the trajectory of China s expanding influence and transitions in world politics more broadly Economic asymmetry as seen in trade concentration non transparency and reliance on bilateral aid has made China s small neighbors vulnerable on the political front thus generating potential threats to their sovereignty and independence Because China has the upper hand in the bilateral relationships these weak states practice dual core hedging as a strategy for survival They hedge on China for expected economic benefits and at the same time hedge against their powerful neighbor to mitigate the risks involved in that hedging on Each small state s mode of hedging depends on its degree of vulnerability and its availability of policy instruments such as multilateral institutions and bilateral partnerships with extra regional powers

The Difference that Gender Makes to International Peace and Security Sara E. Davies,Nicole George,Jacqui True,2018-10-29 Fifteen years after the adoption of UN Security Council Resolution 1325 which establishes the Women Peace and Security agenda there is now a need to assess the impacts of gender equality efforts and to understand why and how gender equality reforms have advanced to the extent that they have This book examines how international peace and security is re envisioned from a gender perspective by mostly focusing on the nuances presented by the Asia Pacific region It argues that despite the diversity of political socio cultural and economic systems in the Asia Pacific women and girls in the region continue to experience similar forms of insecurities Several countries in the Asia Pacific have demonstrated relative

peace and stability In addition women s leadership and participation in peacebuilding are and continue to be increasingly recognized in the region too However as the chapters in this book demonstrate applying a critical gender analysis allows for the interrogation of veneers of political order which can then mask or normalise everyday gendered insecurities The analysis of country cases such as Myanmar Cambodia and Fiji underscores a rethinking of the political order in the Asia Pacific which leaves existing gender inequalities intact The chapters in this book were originally published in a special issue in the International Feminist Journal of Politics

Memorializing Pearl Harbor Geoffrey M. White,2016-03-31 Memorializing Pearl Harbor examines the challenge of representing history at the site of the attack that brought America into World War II Analyzing moments in which history is re presented in commemorative events documentary films museum design and educational programming Geoffrey M White shows that the memorial to the Pearl Harbor bombing is not a fixed or singular institution Rather it has become a site in which many histories are performed validated and challenged In addition to valorizing military service and sacrifice the memorial has become a place where Japanese veterans have come to seek recognition and reconciliation where Japanese Americans have sought to correct narratives of racial mistrust and where Native Hawaiians have challenged their ongoing erasure from their own land Drawing on extended ethnographic fieldwork White maps these struggles onto larger controversies about public history museum practices and national memory
