

CHAPTER 2

STRUCTURE AND FUNCTION OF CELLS

FIGURE 2.1 Here we see a specialised white blood cell attacking many small rod-shaped bacterial cells at the site of an infection. These white blood cells that are part of the body's immune system are produced in the bone marrow and travel via the bloodstream to sites of infection. While various cells have different functions, they share common structural features. In this chapter, we will explore the structure of cells and the passage of materials into cells.

KEY KNOWLEDGE

This chapter is designed to enable students to:

- investigate the defining characteristics of prokaryotic and eukaryotic cells
- identify cell structure and organisation

- investigate the different modes of transport of materials across plasma membranes
