The Burning Answer Keith Barnham, 2015-05-15 Our society faces a choice We could be enjoying a sustainable lifestyle but we have chosen not to In three generations we have consumed half the oil produced by photosynthesis over eight million generations In two generations we have used half our uranium resources With threats from global warming oil depletion and nuclear disaster we are running out of options Solar power as Keith Barnham says is our necessary solution Barnham explains that the roots of solar energy lie in a little known equation $E = hf$ an equation which was coincidentally celebrated and explained to the world by Einstein in the same year he discovered $E = mc^2$ He alleges that the former equation has been overlooked in favor of the latter much to our detriment and Barnham is here to offer us a solution We can still turn things around and solar energy is the key In this provocative inspiring passionately argued book Keith Barnham outlines actions that any one and all of us can take to make an impact now and on future generations The Burning Answer is a solar manifesto for the new climate aware generation and a must read for climate change skeptics

Interdisciplinary Research on Climate and Energy Decision Making M.

Granger Morgan,2022-12-16 This book explores the role and importance of interdisciplinary research in addressing key issues in climate and energy decision making For over 30 years an interdisciplinary team of faculty and students anchored at Carnegie Mellon University joined by investigators and students from a number of other collaborating institutions across North America Europe and Australia have worked together to better understand the global changes that are being caused by both human activities and natural causes This book tells the story of their successful interdisciplinary work With each chapter written in the first person the authors have three key objectives 1 to document and provide an accessible account of how they have framed and addressed a range of the key problems that are posed by the human dimensions of global change 2 to illustrate how investigators and graduate students have worked together productively across different disciplines and locations on common problems and 3 to encourage funders and scholars across the world to undertake similar large scale interdisciplinary research activities to meet the world s largest challenges Exploring topics such as energy efficiency public health and climate adaptation and with a final chapter dedicated to lessons learned this innovative volume will be of great interest to students and scholars of climate change energy transitions and environmental studies more broadly

When Trucks Stop Running A.J. Friedemann,2015-12-09 In lively and engaging language this book describes our dependence on freight transport and its vulnerability to diminishing supplies and high prices of oil Ships trucks and trains are the backbone of civilization hauling the goods that fulfill our every need and desire Their powerful highly efficient diesel combustion engines are exquisitely fine tuned to burn petroleum based diesel fuel These engines and the fuels that fire them have been among the most transformative yet disruptive technologies on the planet Although this transportation revolution has allowed many of us to fill our homes with global goods even a past emperor would envy our era of abundance and the freight transport system in particular is predicated on the affordability and high energy density of a single fuel oil This book explores alternatives to this finite resource including other liquid fuels truck and locomotive batteries and utility scale energy storage technology and various forms of renewable electricity to support electrified transport Transportation also must adapt to other challenges Threats from climate change financial busts supply chain failure and transportation infrastructure decay Robert Hirsch who wrote the Peaking of World Oil Production report for the U S Department of Energy in 2005 said that planning

for peak world production must start at least 10 if not 20 years ahead of time What little planning exists focuses mainly on how to accommodate 30 percent more economic growth while averting climate change ignoring the possibility that we are at or near the end of growth Taken for granted the modern transportation system will not endure forever The time is now to take a realistic and critical look at the choices ahead and how the future of transportation may unfold **Educating**

Second Language Teachers Donald Freeman,2016-09-27 Donald Freeman examines how core ideas and practices in educating second language teachers relate to and differ from teacher education in other content areas He weaves together research in general and second language teacher education with accounts of experience and practice to examine how background knowledge is defined in language teaching Throughout Freeman demonstrates how understanding the processes of teacher learning knowing thinking and reflecting are the same things done differently in second language teacher education *Educating Second Language Teachers* reconsiders pre and in service teacher education and proposes a detailed comprehensive design theory for teacher education A masterful account of the landscape of second language teacher education and the development of its theoretical assumptions and practices It offers a unique and original conceptualization of the field and will be an invaluable resource for teachers teacher educators and researchers Jack C Richards University of Sydney and University of Auckland Additional online resources are available at www.oup.com/elt/teacher/eslt Donald Freeman is Associate Professor of Education at the University of Michigan Oxford Applied Linguistics Series Advisers Anne Burns and Diane Larsen Freeman **Conservation, Sustainability, and Environmental Justice in India** Alok Gupta,2020-12-03

Conservation Sustainability and Environmental Justice in India highlights the environmental challenges that India faces largely due to high population and limited natural resources and discusses the gap between the intent of environmental policies and the actualization of those policies Contributors posit that the protection of the environment poses a fundamental challenge to the nation s desire to industrialize and develop more quickly arguing that the conservation of biodiversity protection of wetlands prevention of environmental pollution and promotion of ecological balance are all crucial in enabling sustainable development This book poses the question of how large a role the judiciary system should play in the protection of the environment as a vital body that passes policies to promote conservation and sustainable development ***Natural Resource Conflicts*** M. Troy Burnett,2016-09-19 Natural resource and environmental conflicts have long been issues confronting human societies This case based examination of a wide range of natural resource disputes exposes readers to many contemporary examples that offer reasons for both hope and concern The Rwandan genocide the Sudanese civil war and perpetual instability in the Middle East and Africa each of these crises have arguably been instigated and maintained by natural resource disputes China has undertaken a Herculean task to plant hundreds of millions of trees along its margins in an effort to save Beijing from crippling dust storms and halt the expansion of the Gobi desert Will it work and is it worth it These and many other cases of conflict stemming from natural resource or environmental concerns are explained and

debated in this up to date examination of contemporary and ongoing topics The book examines conflicts over precious resources and minerals such as diamonds oil water and fisheries as well as the pursuit of lesser known minerals like Coltan and other rare earth elements important resources in our technological age in remote locations such as Greenland and the Congo Each topic contains an overview and two position essays from different authors thereby providing the reader with highly informative and balanced perspectives Reference entries accompany each topic as well helping students to better understand each issue As the world hurtles into the 21st century these natural resource issues are becoming increasingly important with all global citizens having a significant stake in how these conflicts arise and play out
