Registration/paging key:
Search for handsets (press briefly, "Paging" → page 8)
Register handsets (press and hold → page 9).

ECO DECT

During a call, the level of the handset's radio signal adjusts automatically according to the distance between the handset and base station: the shorter the distance, the lower the signal strength (radiation).
The handset's radio signal is switched off when it is in standby mode. The base station, however, maintains contact with the handset with fewer radio signals. In addition, the base station radio signals are switched off when the No Radiation setting is enabled.

MENU ▶ $\boxed{\updownarrow}$ Settings ▶ OK ▶ $\boxed{\updownarrow}$ Base ▶ OK ▶ $\boxed{\updownarrow}$ ECO DECT ▶ OK
▶ No Radiation ▶ OK ($\checkmark$ = radiation switched off, icon E$^+$ in the left-hand corner of the display)

Please note
◆ All registered handsets must support this feature.
◆ For quick connection of incoming calls the handset repeatedly switches to reception mode for short periods. This increases energy consumption and therefore reduces the standby and talk times.

Listed Private Equity: Investment Strategies and Returns Sarah Kumpf,2013 The increasing popularity of private equity PE and especially leveraged buyouts in the late 1980s established a novel area of research in these investments First research concentrated on the taking private of large corporations in the US In his most significant paper Jensen 1989 claimed that PE firms which function as activist investors incentivize the management of their portfolio companies to maximize value and concluded that in the long run private companies owned by PE firms would outperform firms under public ownership Others argued that PE firms simply buy companies at a discount by exploiting private information about the takeover targets or reduce tax spending by highly leveraging the portfolio companies Today many PE firms are publicly listed and the greater transparency and availability of information about these listed PE firms offers a unique basis to conduct research Current research in the field of PE and buyout investments leads to the question in how far PE firms generate value by means of an investment into a portfolio company Usually drivers of value generation are classified into governance financial and operational capabilities of PE firms In addition to these direct drivers of value investment and portfolio management strategies differ with respect to the ways of acquiring and divesting a portfolio company and these different entry and exit channels can in turn offer distinct potential for value generation Therefore this paper first presents the investment and portfolio management strategies of PE firms The strategies include different types of acquisitions and exits as well as the associated drivers of value creation The second objective is to establish a link between different investment strategies and the expected returns generated on the investor level Listed PE allows analyzing the market s reaction to the announcement of investments and divestments within an event study and hypotheses were derived for both of these types of events Thereupon subsamples of announcements are constructed dependent on the way of entry and exit announced as well as on strategic decisions implemented in the portfolio company that is to be disposed   *HWM* ,2008-05 Singapore s leading tech magazine gives its readers the power to decide with its informative articles and in depth reviews   **Broadband Applications and the Digital Home** John Turnbull,Simon G. magazine gives its readers the power to decide with its informative articles and in depth reviews **Proceedings of the 10th International Conference on Computer Recognition Systems CORES 2017** Marek Kurzynski,Michal Wozniak,Robert Burduk,2017-05-05 This book offers a comprehensive study of computer recognition systems one of the most promising directions in artificial intelligence It presents a collection of 52 carefully selected articles contributed by experts in the field of pattern recognition discussing both methodological aspects and applications of current research It includes the following sections Features learning and classifiers Biometrics Data stream classification and big data analytics Image processing and computer vision Medical applications Applications It is a valuable reference tool for scientists dealing with the problems of designing computer pattern recognition systems including researchers and students of computer science artificial intelligence and robotics **Halidom** David Shobin,2022-10-11 Once cultural and athletic competitors Israel and Iran became sworn enemies after the 1979 Iranian Revolution Although a tense coexistence held for over four decades Israeli leaders understood that the fragile peace could crumble at any moment The Mossad insisted that a contingency plan would be crucial for their country s continued survival To that end they devised a scheme that involved placing a deep cover sleeper agent into the upper echelons of Iranian government and society Renowned Iranian archeologist Ezekiel Darvish was the perfect mole Born and raised in Tehran he hadn t learned that he was a Jew until he was a teenager But once he did as a bon vivant and scholar he moved seamlessly through Iranian academia and politics clandestinely supplying the Mossad with telltale secrets needed to achieve their ultimate goal a durable permanent Middle East peace Yet even Darvish is an unwitting pawn Having been born out of wedlock he never knew his father But the moment that secret is uncovered he understands that its revelation could either help him or destroy him With the aid of American confidants Darvish struggles to keep out of Iranian crosshairs until the mission is accomplished **The Interaction Between Competition Law and Corporate Governance** Florence Thépot,2019-02-14 Florence Th pot provides the first systematic account of the interaction between competition law and corporate governance She challenges the black box conception of the firm or undertaking in competition law as applied to increasingly complex corporate relations The book opens the black box of the firm to understand the internal drivers of collusive behaviour and proposes a unified approach to cartel enforcement based on the agency theory It explores key issues including corporate compliance programmes the attribution of liability in corporate groups and structural links between competitors and should be read by anyone interested in how the evolution of the corporate landscape impacts competition law **Presumption of Innocence in EU Anti-Cartel Enforcement** Aistė Mickonytė,2018-11-26 In this monograph Aist Mickonyt examines the compliance of the European anti cartel enforcement procedure with the presumption of innocence under Article 6 2 of the European Convention on Human Rights ECHR The author maintains that the pursuit of manifestly severe punishment with insistence of the European Commission on administrative level procedural safeguards is inconsistent with the robust standards of protection under the Convention

Arguing that EU anti cartel procedure is criminal within the meaning of the Convention this work considers this procedure in light of the core elements of the presumption of innocence such as the burden of proof and the principle of fault The author zeroes in on the de facto automatic liability of parental companies for offences committed by their subsidiaries **EU Law Enforcement** Stefano Montaldo,Francesco Costamagna,Alberto Miglio,2021-02-22 The existence of a structured enforcement system is an inherent feature of national legal orders and one of the core elements of State sovereignty The very limited power to issue sanctions has often been deemed a gap in the EC legal order Over the years the situation has progressively changed The Union s institutional setting is growing in complexity and a variety of agencies has been or is expected to be endowed with law enforcement responsibilities In addition the so called competence creep has led the EU to play an increasingly prominent role in several areas of EU law enforcement including the issuing of sanctions This book examines these developments focusing on both the general features of the EU legal order and the analysis of key substantive areas such as banking and monetary union environmental law and data protection The work thus presents a general framework for understanding EU sanctioning based on structural features and general legal principles Part I develops an analytical framework tracking the most significant evolutive patterns of EU sanctioning powers Part II adopts a more practical approach focusing on specific issues and policy areas The book bridges a gap in existing literature and sheds new light on the relationship between the exercise of jus puniendi and the evolution of EU integration
