**New simple ways to solve equations** Einar Östmyren, 2018-03-15 In this book I present a unique formula for quadratic equations which is a rewriting of the  $p$   $q$  formula This rewriting resulted in the equations being solved almost twice as fast by the new formula when it was compared in a test with the  $p$   $q$  formula Another test also showed that the new formula was much faster than the Vedic formula The new formula is unique because the equations in the test were solved by mere mental calculation which improves the memory and increases mental agility and intelligence When I discovered that the middle coefficient in a quadratic equation contains all information about its origin it led to a rule that simplified the solving of all equations In a quadratic equation the origin could be located and then it became possible to create a rule how the coefficients were to be split up into factors By means of this rule and some exercises the answer to an equation can be both calculated and checked regardless of how large the coefficients are This universal method is intended to be used before the equation is solved by a formula Since the origin of a quadratic equation could be located it was also simple to find the origin to other types of equations and therefore new methods could be created This led to the fact that a cubic equation could be solved without taking detours like polynomial division a guess or a test of a root When the origin of an equation can be located it is as easy to solve a fifth degree equation as a quadratic equation in the same simple way as unlocking a safe with a key The purpose of the book is mainly to make it as simple as possible for the students to solve equations but also to give them a good insight into the origin of an equation *Quadratic Equation* Prashant Singh, 2018-10-13 This Book Deals With The Most Common And Important Topic Quadratic Equation This Book Guide Student Of Zero Level To High Level Its Starts With Basic Concept Of Quadratic Equation And End With High Level Fast Trick With The Help Of This Book You Can Solve The Question Without Pen And Paper That s Given In Last Of Book You Must Read Full Book Starting From Basic To High Level Short Tricks I Hope You Enjoy This Book All Competitive Exam Like Bank Ssc Railway Asked Question Related To Quadratic Equation Ones You Read Book You Will Master Of Quadratic Equation You Can Solve One Question Less Than 10 Sec For more detail you can visit [www helpbook247 com](http://www.helpbook247.com) or Follow youtube channel ssc funda helpbook For any offer and tips you follow my website [www helpbook247 com](http://www.helpbook247.com) Follow youtube channel ssc funda helpbook for more study videos
