Resilient Participation Simon Bell, Stephen Morse, 2013-07-03 Stakeholder or public participation has become something of a modern mantra employed in all sorts of contexts to give people a voice There are many variants on this participation but traditionally they all share a desire to maximise involvement and provide desired outputs of a required quality as quickly and as cheaply as possible Difference tends to be reduced and compromise encouraged as the outputs or even just the appearance of participation are emphasised This book explores the large and diverse range of participatory methods currently in use examines the problems and gaps in these methods and sets out an innovative new methodology which overcomes these shortcomings Uniquely this method builds from the assumption that it is not just the outputs that matter in participation it is also the journey Triple Task is designed to help groups explore

their current situation and develop a path by which they can improve their functioning and ultimately make a positive contribution to the lives of others The book includes in depth case studies of Triple Task in action across a range of contexts and countries with particular focus on an EU project concerning indicators in policy making This new approach can be used in any context and with any sort of group to help them produce more informative outputs in which a deep reflection of how the group works is allied to an analysis of how problems can be solved **Social Psychology Quarterly** ,1979
