Doing Algebra Steve Rhine,Rachel Harrington,Colin Starr,2018-11-01 Algebra is the gateway to college and careers yet it
functions as the eye of the needle because of low pass rates for the middle school high school course and students struggles
to understand We have forty years of research that discusses the ways students think and their cognitive challenges as they
engage with algebra This book is a response to the National Council of Teachers of Mathematics NCTM call to better link
research and practice by capturing what we have learned about students algebraic thinking in a way that is usable by
teachers as they prepare lessons or reflect on their experiences in the classroom Through a Fund for the Improvement of
Post Secondary Education FIPSE grant 17 teachers and mathematics educators read through the past 40 years of research
on students algebraic thinking to capture what might be useful information for teachers to know over 1000 articles
altogether The resulting five domains addressed in the book Variables Peterson Leatham 2009 The purpose of this book is to
accelerate early career teachers experience with how students think when doing algebra in middle or high school as well as
to supplement veteran teachers knowledge of content and students The research that this book is based upon can provide
teachers with insight into the nature of a student s struggles with particular algebraic ideas to help teachers identify patterns
that imply underlying thinking Our book How Students Think When Doing Algebra is not intended to be a how to book for
teachers Instead it is intended to orient new teachers to the ways students think and be a book that teachers at all points in
their career continually pull of the shelf when they wonder how might my students struggle with this algebraic concept I am
about to teach The primary audience for this book is early career mathematics teachers who don t have extensive experience
working with students engaged in mathematics However the book can also be useful to veteran teachers to supplement their
knowledge and is an ideal resource for mathematics educators who are preparing preservice teachers **Reading, Grade 6**
