*Rollover Accident Reconstruction* Nathan A Rose, Gray Beauchamp, Alan F Asay, 2018-08-07 According to the National Highway Traffic Safety Administration of the nearly 9.1 million passenger car SUV pickup and van crashes in 2010 only 2.1% involved a rollover. However rollovers accounted for nearly 35% of all deaths from passenger vehicle crashes. In 2010 alone more than 7,600 people died in rollover crashes. Rollover accidents continue to be a leading contributor of vehicle deaths. While this continues to be true it is pertinent to understand the entire crash process. Each stage of the accident provides valuable insight into the application of reconstruction methodologies. Rollover Accident Reconstruction focuses on tripped single vehicle rollover crashes that terminate without striking a fixed object. Topics featured in this book include Analysis methods through various accident phases including advanced simulation. Vehicle event data recorder usage. Occupant ejection during rollover crash. The goal of this title is to break down the various phases of a rollover crash to analyze each stage for use in the reconstruction process to the greater understanding of crash analysts, consultants and safety engineers alike.

*PATROL FIELD PROBLEMS AND SOLUTIONS* Harry W. More, 2001-01-01 Patrol Field Problems and Solutions was developed as an operational manual for law enforcement officers working in the field. Because policies and regulations are always changing in police agencies this guide offers timely solutions to problems and situations commonly encountered in the field. Criminal acts with which law enforcement officers must deal range from that of a serial killer or rapist to petty theft and vandalism by juveniles. This book offers case examples together with solutions to promote the best possible action by police. Topics include domestic violence situations, traffic violations, federal offenses, child abuse, sex offenses, hate and bias crimes and substance abuse as it relates to criminal activity. There are guidelines for search and seizure procedures dealing with mentally impaired individuals working with youthful offenders and protocol for finding wanted and missing persons. Crime scene investigation is explained as well as working in cooperation with other agencies. This book can be used as a training manual for new recruits and as a method for evaluating performance of officers already working in the field.
