

Measure UP! Worksheet

Baking requires the most accurate measurements possible so the product turns out the same each time. Scales are most accurate. It is always best to use the fewest number of measuring steps or units possible for the most accuracy. EX: It is more accurate to measure 14-cup flour with 5-cup + 9-cup (2+3) than it is to use 14 = 5 + 9 (3+3+3+3). Also, it's best to measure liquids with a liquid cup unless the recipe calls for less than 4 tablespoons (3/4 cup).

A. tablespoon

B. teaspoon

C. 1/4-teaspoon

D. 1/8-teaspoon

E. electronic scale

F. liquid measuring cup

G. hand

H. 1 cup

I. 5-cup

J. 1/3-cup

K. 1/4-cup

L. 1/8-cup

Directions:

For each ingredient listed, write in the blank the combination of letters you would use for the BEST way to measure that ingredient. In some cases, two answers may work. List all the best options. Use the Measurement Guide for equivalents and abbreviation help.
