Hjellbrekke, Felix Bühlmann, Mike Savage, 2017-12-06 Since the financial crisis the issue of the one percent has become the centre of intense public debate unavoidable even for members of the elite themselves Moreover inquiring into elites has taken centre stage once again in both journalistic investigations and academic research *New Directions in Elite Studies* attempts to move the social scientific study of elites beyond economic analysis which has greatly improved our knowledge of inequality but is restricted to income and wealth In contrast this book mobilizes a broad scope of research methods to uncover the social composition of the power elite the field of power It reconstructs processes through which people gain access to positions in this particular social space examines the various forms of capital they mobilize in the process economic but also cultural and social capital and probes changes over time and variations across national contexts Bringing together the most advanced research into elites by a European and multidisciplinary group of scholars this book presents an agenda for the future study of elites It will appeal to all those interested in the study of elites inequality class power and gender inequality *Life in the Age of Drone Warfare* Lisa Parks, Caren Kaplan, 2017-10-19 This volume's contributors offer a new critical language through which to explore and assess the historical juridical geopolitical and cultural dimensions of drone technology and warfare They show how drones generate particular ways of visualizing the spaces and targets of war while acting as tools to exercise state power Essays include discussions of the legal justifications of extrajudicial killings and how US drone strikes in the Horn of Africa impact life on the ground as well as a personal narrative of a former drone operator The contributors also explore drone warfare in relation to sovereignty governance and social difference provide accounts of the relationships between drone technologies and modes of perception and mediation and theorize drones relation to biopolitics robotics automation and art Interdisciplinary and timely *Life in the Age of Drone Warfare* extends the critical study of drones while expanding the public discussion of one of our era's most ubiquitous instruments of war Contributors Peter Asaro Brandon Wayne Bryant Katherine Chandler Jordan Crandall Ricardo Dominguez Derek Gregory Inderpal Grewal Lisa Hajjar Caren Kaplan Andrea Miller Anjali Nath Jeremy Packer Lisa Parks Joshua Reeves Thomas Stubblefield Madiha Tahir *The Neoliberal Diet* Gerardo Otero, 2018-10-03 This remarkable comprehensive study of neoliberal agribusiness and the obesity epidemic is critical reading for food studies scholars Contemporary Sociology Obesity rates are rising across the United States and beyond While some claim that people simply eat too much energy dense food while exercising too little *The Neoliberal Diet* argues that the issue is larger than individual lifestyle choices Since the 1980s the shift toward neoliberal regulation has enabled agribusiness multinationals to thrive by selling a combination of meat and highly processed foods loaded with refined flour and sugars a diet that originated in the United States Drawing on extensive empirical data Gerardo Otero identifies the socioeconomic and political forces that created this diet which has been

exported around the globe at the expense of people's health Otero shows how state level actions particularly subsidies for big farms and agribusiness have ensured the dominance of processed foods and made fresh foods inaccessible to many Comparing agrifood performance across several nations including the NAFTA region and correlating food access to class inequality he convincingly demonstrates the structural character of food production and the effect of inequality on individual food choices Resolving the global obesity crisis Otero concludes lies not in blaming individuals but in creating state level programs to reduce inequality and make healthier food accessible to all

Towards a Political Economy of Degrowth, Ekaterina Chertkovskaya,, Alexander Paulsson, Stefania Barca, 2019-10-04 Since the 1970s the degrowth idea has been proposed by scholars public intellectuals and activists as a powerful call to reject the obsession of neoliberal capitalism with economic growth an obsession which continues apace despite the global ecological crisis and rising inequalities In the past decade degrowth has gained momentum and become an umbrella term for various social movements which strive for ecologically sustainable and socially just alternatives that would transform the world we live in How to move forward in an informed way without reproducing the existing hierarchies and injustices How not to end up in a situation when ecological sustainability is the prerogative of the privileged direct democracy is ignorant of environmental issues and localisation of production is xenophobic These are some of the questions that have inspired this edited collection Bringing degrowth into dialogue with critical social theories covering previously unexplored geographical contexts and discussing some of the most contested

concepts in degrowth the book hints at informed paths towards socio ecological transformation Cooperation and Conflict between Europe and Russia Magdalena Dembińska, Frederic Mérand, 2021-08-26 When thinking about relations between Europe and Russia International Relations scholars focus on why conflict has replaced cooperation The geostrategic debate excludes the possible coexistence of cooperation and conflict Tracking the evolution of conflict and cooperation patterns in three zones of contact Estonia Kaliningrad and Moldova between 1991 and 2016 this edited volume argues that although the standard narrative remains compelling local patterns of cooperation and conflict are partly autonomous from the geostrategic level To account for the coexistence of cooperation and conflict the first chapter elaborates a theoretical proposition distinguishing fluid rigid and disputed symbolic boundaries which have different impacts on the ground The subsequent chapters address distinct dimensions of Euro Russian relations paying attention to local reality in Estonia Moldova Ukraine or Kaliningrad different sectors from energy to peoples movement and across institutional contexts such as the EU and NATO They confirm that the standard narrative holds in most cases but also that Euro Russian relations vary in crucial ways according to the interests and representations of actors immersed in specific geopolitical fields Despite a deterioration of geostrategic relations between Europe and Russia since the end of the Soviet Union *Cooperation and Conflict between Europe and Russia* explores the intriguing coexistence of conflict and cooperation at the local level and across sectors and institutions The chapters in this book were originally published as a special issue of the journal *East European Politics*

Putin's Labor Dilemma Stephen Crowley, 2021-07-15 In *Putin's Labor Dilemma* Stephen Crowley investigates how the fear of labor protest has inhibited substantial economic transformation in Russia Putin boasts he has the backing of workers in the country's industrial heartland but as economic growth slows in Russia reviving the economy will require restructuring the country's industrial landscape At the same time doing so threatens to generate protest and instability from a key regime constituency However continuing to prop up Russia's Soviet era workplaces writes Crowley could lead to declining wages and economic stagnation threatening protest and instability Crowley explores the dynamics of a Russian labor market that generally avoids mass unemployment the potentially explosive role of Russia's monotowns conflicts generated by massive downsizing in Russia's Detroit Tol yatti and the rapid politicization of the truck drivers movement Labor protests currently show little sign of threatening Putin's hold on power but the manner in which they are being conducted point to substantial chronic problems that will be difficult to resolve *Putin's Labor Dilemma* demonstrates that the Russian economy must either find new sources of economic growth or face stagnation Either scenario market reforms or economic stagnation raises the possibility even probability of destabilizing social unrest

Bicycle Justice and Urban Transformation Aaron Golub, Melody L. Hoffmann, Adonia E. Lugo, Gerardo F. Sandoval, 2016-07-15 As bicycle commuting grows in the United States the profile of the white middle class cyclist has emerged This stereotype evolves just as investments in cycling play an increasingly important role in neighborhood transformations However despite stereotypes the

cycling public is actually quite diverse with the greatest share falling into the lowest income categories Bicycle Justice and Urban Transformation demonstrates that for those with privilege bicycling can be liberatory a lifestyle choice whereas for those surviving at the margins cycling is not a choice but an often oppressive necessity Ignoring these invisible cyclists skews bicycle improvements towards those with choices This book argues that it is vital to contextualize bicycling within a broader social justice framework if investments are to serve all street users equitably Bicycle justice is an inclusionary social movement based on furthering material equity and the recognition that qualitative differences matter This book illustrates equitable bicycle advocacy policy and planning In synthesizing the projects of critical cultural studies transportation justice and planning the book reveals the relevance of social justice to public and community driven investments in cycling This book will interest professionals advocates academics and students in the fields of transportation planning urban planning community development urban geography sociology and policy
