Houston, 2019-05-01 Imagining Seattle dives into some of the most pressing and compelling aspects of contemporary urban governance in the United States Serin D Houston uses a case study of Seattle to shed light on how ideas about environmentalism privilege oppression and economic growth have become entwined in contemporary discourse and practice in American cities Seattle has by all accounts been hugely successful in cultivating amenities that attract a creative class But policies aimed at burnishing Seattle s liberal reputation often unfold in ways that further disadvantage communities of color and the poor complicating the city s claims to progressive politics Through ethnographic methods and a geographic perspective Houston explores a range of recent initiatives in Seattle including the designation of a new cultural district near downtown the push to charge for disposable shopping bags and the advent of training about institutional racism for municipal workers Looking not just at what these policies say but at how

they work in practice she finds that opportunities for social justice sustainability and creativity are all constrained by the prevalence of market oriented thinking and the classism and racism that seep into the architecture of many programs and policies Houston urges us to consider how values influence actions within urban governance and emphasizes the necessity of developing effective conditions for sustainability creativity and social justice in this era of increasing urbanization **The Software Encyclopedia 2000** Bowker Editorial Staff,2000-05 *CORP 2012 - Proceedings/Tagungsband* Manfred Schrenk,Peter Zeile,Vasily V.
