These include drug targeting, biomolecular therapeutics, development of chemical biology tools, data collection and analysis in silico models as predictors for biological properties, identification and validation of new targets, approaches to quantify target engagement, new methods for synthesis of drug candidates such as green chemistry, development of novel scaffolds for drug discovery and the role of regulatory agencies in drug discovery. Reviews the strategies, technologies, principles and applications of modern medicinal chemistry. Provides a global and current perspective of today's drug discovery process and discusses the major therapeutic classes and targets. Includes a unique collection of case studies and personal essays reviewing the discovery and development of key drugs.

Reproductive Neuroendocrinology and Social Behavior, Ishwar S. Parhar, Tomoko Soga, Sonoko Ogawa, 2016-10-12. Anti social behaviors and social deficits induced mental disorders are critical problems in our society today. Social behaviors and interactions are shaped by experience, hereditary components, genes, hormones and neuropeptides and environmental factors, photoperiods and metabolic signals. In addition to the classical gonadotropin releasing hormone (RFamide) peptides, kisspeptin and gonadotropin inhibiting hormone are emerging as important regulators of the reproductive axis. These neuropeptides are evolutionarily conserved and are regulated by environmental factors. In this Research Topic we advocate more recent advances in reproductive neuropeptides and sex steroids in the domains of social behavior including sexual and parental behavior, aggression, stress and anxiety. Using multiple species model we also review how genes and the neuroendocrine system interact at the cell and organismic levels to contribute to social behavior, in particular the epigenetic/genomic changes caused by early life environment. We provide comprehensive insights of distinct neural networks and how cellular and molecular events in the brain regulate social behavior from a comparative perspective.
